Product Details

These disposable MTA carries are designed to deliver MTA directly to the apex of the root canal and come individually pouched. They can also be used for a broad range of clinical MTA applications, including internal perforation repairs to root-end fillings.

The disposable carries allow for less waste of MTA material and eliminate the need to clean instruments that may become clogged as the MTA material quickly hardens during procedures. Available in 10 packs of 3 sizes: 0.80mm, 0.99mm, and 1.60mm.

Product Details

PacEndo™ iRoot Pro Plus™ is a compact, continuous and reciprocating ergonomically-designed cordless base and motor with an accurate built-in apex locator. With a hybrid design, the iRoot Pro Plus™ allows the portability of a cordless motor with the easy controls access of a reliable bench motor. Rotation, torque, and the exclusive ability to control angles in reciprocation make the iRoot Pro Plus™ a true open endodontic motor. It is a battery-operated portable cordless endodontic motor electronically connected with the base unit which reduces cord drag, increases mobility, and is compatible with the most known rotary and reciprocating endodontic file systems.
