Square Up Accurately

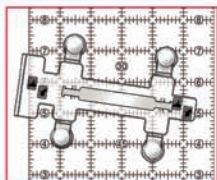

Quilt Ruler Connector

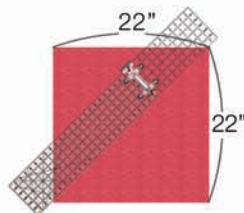

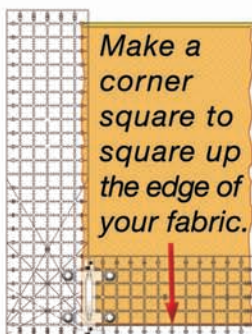

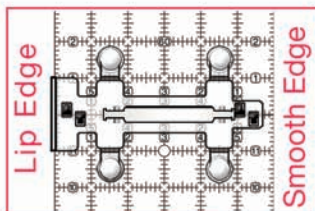

\$11.95

Item# QR-CNX

Use as a handle on a single ruler.

Built-in Lip Edge & Alignment Tabs make it easy to accurately align & connect rulers that are the same width.

Make a 3-foot ruler for bias binding strips.

Connect two easy-to-carry 6"x12" rulers into a 24" ruler or 12" square.

Both Connectors Include Handles.

Handle & Connector

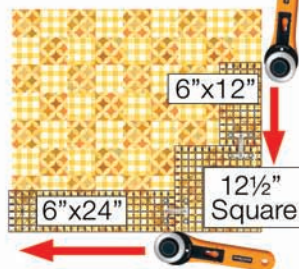

\$9.95

Item# QR-HNC

Make lifting & lining up easier

&

Connect rulers of different widths to square up quilts.

No lip edge is better when connecting rulers that are different widths.

Quilt Ruler Upgrade Kit

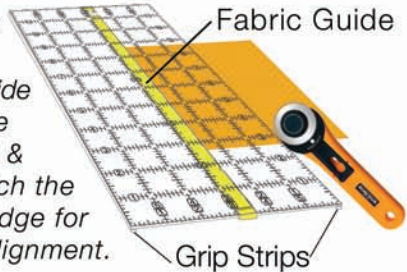

\$27.95

Item# QR-UPKT

Mistake-proof & slip-proof the 12" and 24" quilt rulers you already have.

Clip-on & slide the Fabric Guide to the line you want & it will catch the fabric's edge for perfect alignment.

Includes:

- 6 crystal clear Grip Strips: Repositional, Removable. Leave no sticky residue.
- 2 Fabric Guides for 12" and 24" rulers.
- Built-in super tough stretchy bands ensure the Guides line up straight. (Also works on 12½" & 24½" rulers.)

Grip Strips

\$9.95

Item# QR-GS

Slip-proof all your rulers & templates.

Without Grip Strips:

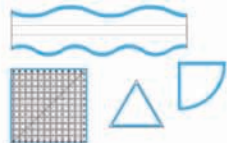

With Grip Strips:

Crystal Clear Grip Strips slide easily over your fabric when lining up, but just a little pressure locks your ruler in place while cutting.

Cut or bend to fit any size or shape.

Sew Accurately

Super Easy Seam Guide Setter

\$14.95
Item# SE-SGS

Align a peel & stick Seam Guide at an accurate Scant $\frac{1}{4}$ " on any machine.

- Seam Guide Setter
- Six Seam Guides

It's *Super Easy* to put a Guide in the slot. Hook it on your needle and press the Guide down in place.

Stop Sewing Accurately

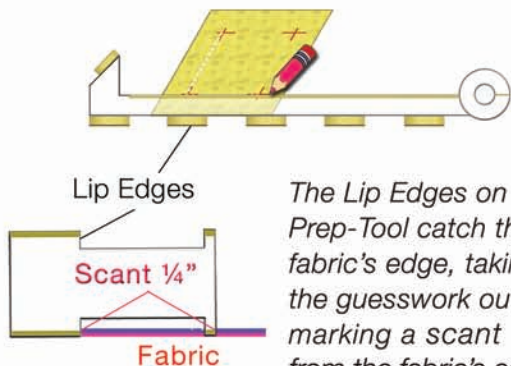

Prep-Tool

\$11.95
Item# GL-PT

- Mark Scant $\frac{1}{4}$ "
- Trim Triangles

Patterns often tell you to stop a $\frac{1}{4}$ " from the edge. What they mean is to stop right at your seam line, which is actually a scant $\frac{1}{4}$ " from the fabric's edge.

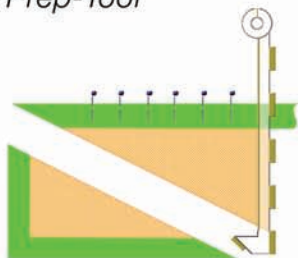

The Lip Edges on the Prep-Tool catch the fabric's edge, taking the guesswork out of marking a scant $\frac{1}{4}$ " from the fabric's edge.

Mark the stopping point with the Prep-Tool for sharp Mitered Corners.

For sharp Mitered Binding Corners:

The secret is to stop right at the seam line.

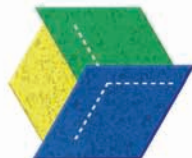

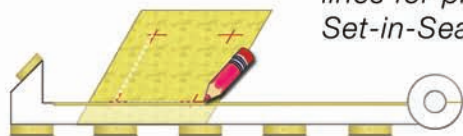

Start & Stop for Set-In-Seams

Knowing exactly where to start & stop sewing is the secret for blocks like these.

Accurately mark seam lines for precise Set-in-Seams.

Line Up Accurately

Sometimes, pre-trimming triangle points takes the guesswork out of lining pieces up accurately.

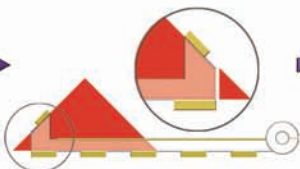

Before Trim

Hard to align.

Trim points

After Trim

Easy to Align.

Combos for Regular Rulers

Perfect4Pattern Set

\$54.85

3 Steps to get great results when following patterns:

- Square Up Accurately.
