

# How do I put the cover on my Simba Orbit™ Weighted Blanket?

**The blanket is made up of two components:**

An inner weighted shell **A** and an outer cover **B**

## Step 1

Lay the inner weighted shell **A** on a flat surface.

## Step 2

Locate the concealed zipper **C** on the outer cover **B**.

## Step 3

Turn the outer cover **B** inside out.

## Step 4

Align the corner ties **D** of both the inner weighted shell **A** and the outer cover **B**.

## Step 5

With a bow, use the corner ribbons **E** to tie the outer cover **B** to the inner weighted shell **A**.

## Step 6

Reach through the zipper **C** and grab the opposite corners of the blanket.

## Step 7

Pull the furthest corners completely through the zipper **C** opening and thus turning the entire blanket outside in.

## Step 8

Shake each side of the blanket with a wave motion to rebalance the glass beads.

## Step 9

Close the zipper **C**.

## Step 10

Enjoy a great nights sleep.

### Key

- A** Inner weighted shell
- B** Outer cover
- C** Zipper
- D** Corner ties
- E** Corner ribbon
