

## Rope rescuer.

Protects heavily used rope ends.

The DEUS "O" lets you protect the ends of any rope, any time, from abrasion and cuts from carabiners or other connectors.

Each DEUS "O" is a machined aluminum "O" shaped adapter with a deep flange that envelops your rope. Just use a barrel knot to tie the "O" into an end termination to form an eye. Now your rope is protected from the wear and tear caused by connectors, so your rope is safer and lasts longer.

### Improving Rope Life

Tie a knot in an end of a rope, clip in a carabiner and use it for a few hours, and the end of the rope is ruined. The "O" eliminates rope wear. It also makes the rope stronger, protecting the rope from sharp bends. Because the "O" is a perfect circle, there are no sharp edges like conventional thimbles.

The channel on the "O" is deep and wide, so rope is snug and completely protected. No exposed rope at the perimeter like on conventional thimbles.

### Choices

The DEUS "O" is available in five sizes to fit any rope:

- DEUS #1 "O" has a 6 mm rope channel for 4-6 mm rope
- DEUS #2 "O" has an 8 mm rope channel for 6-8 mm rope
- DEUS #3 "O" has a 10 mm rope channel for 8-10 mm rope
- DEUS #4 "O" has a 13 mm rope channel for 10-13 mm rope
- DEUS #5 "O" has a 15.5 mm rope channel for 13-15.5 mm rope

All sizes are available in standard silver or tactical black.

Use the DEUS "O" #4 and #5 to share the load in complex rigging arrangements.

When lives are on the line, trust DEUS Rescue.
