Kathleen Bellicchi  
Bellicchi's Best Biscotti

**RE: Shelf Life and Storage Recommendations**

Dear Kathleen

Thank you for reaching out to us regarding the shelf life and storage of your biscotti products.

Through testing in our laboratory, it was determined that your product has a one-year shelf life at ambient temperatures.

During the testing process your product was stored in a controlled environment with temperatures ranging from 21°C to 24°C (70°F to 75°F) with no direct contact with sunlight.

The recommended shelf life of one year, therefore, is only based on the above described storage conditions.

You requested a statement that could be provided to customers to guide them in storing your product. I suggest the following:

Biscotti products manufactured by Bellicchi's Best remain fresh at standard room temperatures without extended direct exposure to sunlight for one year.

Please contact us if you require more information.

With Warmest Regards,

Jon Trelfa, President
