# Vactrap™ G
VACUUM ASPIRATION SYSTEM

Installation Instructions:

1. Open shipping box.
2. Remove the assembly from the shipping box.
3. Remove the twist-tie from the bag.
4. Remove the bin containing the glass bottles, and the bag containing tubing assembly.
5. Open the bag containing the tubing assembly.
6. Remove the tubing assembly from the bag and unwind the tubing.
7. Thread each cap GL45 from the tubing assembly onto the corresponding containers as shown on the assembly stages below (cap should be tightened clockwise):
   7.1 **Note:** If the bottles are different sizes, the cap with the vent filter tubing side attached will go onto the smaller bottle.
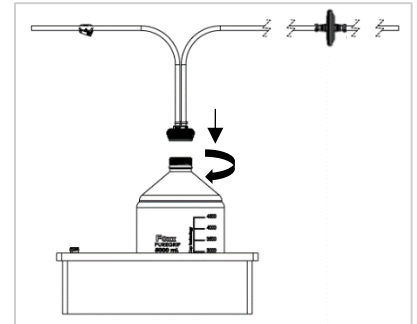

Assembly Stage I:
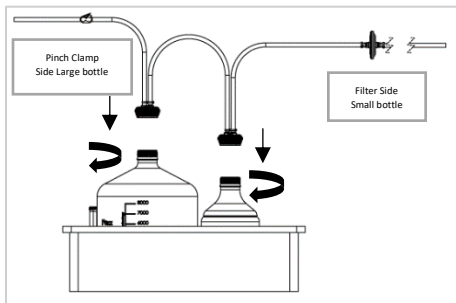

Two Different Size Glass Bottles Assembly
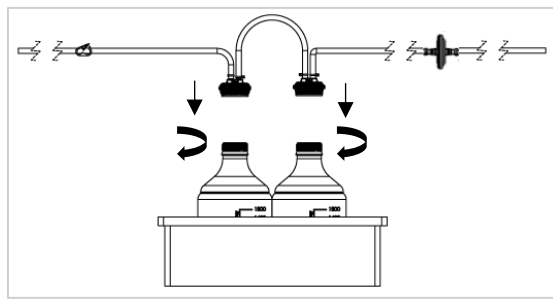

Same Size Glass Bottles Assembly
*Pinch Clamp and Filter side will not affect configuration

One Glass Bottle Assembly
*Pinch Clamp and Filter side will not affect configuration

Assembly Stage II:

Two Different Size Glass Bottles Assembly
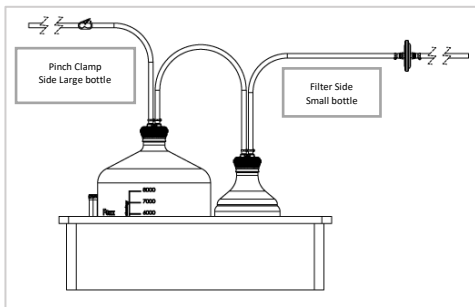

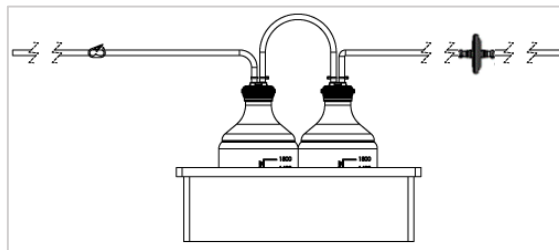

Same Size Glass Bottles Assembly
*Pinch Clamp and Filter side will not affect configuration
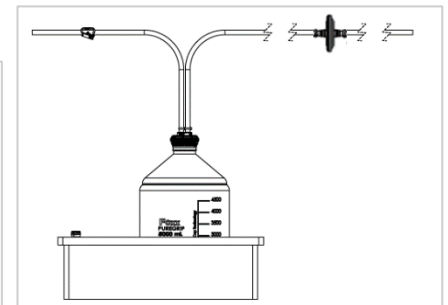

One Glass Bottle Assembly
*Pinch Clamp and Filter side will not affect configuration

8. Hand torque each cap after threading the cap to the respective bottles.
9. Centrifuge tube should be on the same side as the tubing with pinch clamp. Tubing can be put into centrifuge tube when not in use.
10. Media suction side has the pinch clamp. Tubing with filter attaches to the vacuum pump.
11. Assembly Complete.
