

- Hose barb sizes range from 1/16" - 1/2"
- Available in PVDF and PTFE
- Sterile and non-sterile options
- Autoclavable and gamma-stable options
- Comply with USP Class VI standards

Foxx Life Sciences' EZBio<sup>®</sup> Anchor dip tube sinkers are the perfect way to keep dip tubes anchored at the bottom of a vessel. Tubing connects easily to the hose barb, while the recessed bottom of the Anchor ensures optimal depth and flow rate without risk of suction against the vessel.

These Anchors are constructed from either a solvent-resistant, autoclavable, USP Class VI PTFE or Gamma Stable Class VI PVDF. With hose barb sizes ranging from 1/16" ID to 1/2" ID, Foxx Life Sciences' EZBio<sup>®</sup> Anchor has the versatility to match any of your design requirements.

- 1 Hose barb for attaching tubing
- 2 Anchor body diameter ranges from 0.75" - 1.00"
- 3 Recessed bottom prevents suction against container
