- Fully welded to remove crevices and dead spaces
- Meets or exceeds all requirements for GMP and FDA

Foxx Life Sciences consistently provides quality products through continuous improvement and delivers innovative solutions. In line with our commitment to innovation, we present the EZFil® Powder Cap.

The EZFil® Powder Cap features a welded 4" Tri Clamp fitting, providing a sanitary, enclosed connection. This closed design allows for seamless powder transfer while reducing expenses by mitigating spillage of costly media and improving formula preparation timing.

The EZFil® Powder Cap allows for ease of use without the risk of contamination found in traditional secondary tools, such as funnels, making this the ideal addition to the laboratory.
