

- Available in clear and amber options
- Sizes range from 100 mL - 20 L
- Highest Polypropylene cap temperature rating in the industry, 142°C
- Industry standard GL45 thread, compatible with Autofil™ Bottle-Top Filters and EZBio® Single-Use Cap Assemblies
- Large, visible writing surface on bottle for additional labeling; white graduations for identification of approximate volume; retrace code for identification
- BOROSIL® 3.3 Borosilicate Glass is mechanically strong, chemically resistant, and withstands thermal shock
- Bottle, VersaCap®, and Pouring Ring are autoclavable and complies with USP-VI

PUREGRIP® Round Glass Media Storage Bottles combine the leading quality of BOROSIL® 3.3 Borosilicate Glass with the patented advantages of the new Foxx GL45 VersaCap® to produce a true leap forward in laboratory glassware. Ideal for mixing, storage, and transportation of media, buffers, chemicals, and solvents, **PUREGRIP® Bottles** offer versatility across a wide variety of laboratory needs. And with Foxx's revolutionary GL45-threaded polypropylene VersaCap®, **PUREGRIP® Bottles** are substantially easier to hold securely, improving lab safety and user experience.

PUREGRIP® Bottles are autoclavable, reusable, and graduated in mL. A large writing space allows for visible labeling, and an extra frosted surface on the VersaCap® offers a convenient second location for writing. Manufactured from top-quality glass, **PUREGRIP® Bottles** are highly resistant to thermal shock. And with an industry-leading maximum temperature rating of 142°C, the VersaCap® stands up to even the toughest conditions.

- 1 Frosted surface on top of cap for convenient labeling
- 2 Patented SECUREGRASP technology built into cap for ultimate ease of handling, especially with gloved hand
- 3 USP Class VI, Animal-Free Polypropylene VersaCap® and Pouring Ring for leakproof, drip-free experience
- 4 Sloped shoulders for smooth, natural pouring motion
- 5 Glass bead indicates full capacity level
- 6 Large, visible writing surface on bottle for additional labeling; white graduations for identification of approximate volume; retrace code for identification
- 7 Easy to read graduation marks
