一. Introduction of Indicator Lights

4 blue indicators from left to right: Battery indicator, indicate the battery capacity at present, 4 blue indicator in total, if 4 lights are light on, the battery is full, if only 2 indicator light are on that the battery is only about 50% charged.

Rightmost 2 lights is Bluetooth indicator: If Bluetooth is not connected, the 2 light flash. After Bluetooth is connected, the blue indicator light will be on, if in the TF card mode or AUX mode, the red indicator light will flash.

When the battery voltage is lower than 3.4V, there will be a voice prompt for low battery, at this time the device needs to be charged, if not charged after 10 seconds, it will prompt again, then power off.

Bluetooth connection and phone calls operation.

Speaker power ON or switch to Bluetooth mode , "ENTER TO BLUETOOTH" voice prompt appears, red and blue lights will flash.

Turn on Bluetooth function and find the device "BT-168" on your Bluetooth enabled device.

To activate pairing the device and the speaker manually and then "BLUETOOTH CONNECT" voice prompt appears.

The above procedure is necessary only when using the speaker for the first time.

After connecting successfully, play the music on your Bluetooth device and it will transmit to the speaker

Paired speaker and mobile phone as above. Blue LED light stays on. Dial the phone number on your mobile phone and the phone audio will broadcast from the speaker and you can talk via the built in microphone hands free.(NOTE: Facing in the direction of the microphone during phone calls can get better audio quality.)

To answer or disconnect a call press play/pause once.

二. Music Player Operation

Turn on speaker and switch to music mode. Insert Micro SD card to read the files automatically. Plug in 3.5mm cable to AUX to play music.

A short press will move to the previous or next clip. A long press will increase or decrease the volume

三. Power Bank

Plug in standard USB cable on power bank and the other end should be plugged in the device needed to recharge.

Press to turn on the power bank and begin charging with 5V/2.1A power to the external device. LED lights shows the battery status of power bank. If you unplug the USB cable, the power bank turns off automatically after 15 seconds.

After unplugging the USB cable, or when the device does not detect there is an external device plugged in, it will disconnect 5V power output automatically after about 130 seconds to saving energy.

Flashlight

Press twice to turn on the power bank, LED light on. Press twice to turn off the power bank, LED light out. A long press of the power button will start the LED light flashing, another long press of the power button and the LED light will stop flashing.
