HANDCRAFTED EXHAUST SYSTEMS  
V-TWIN 2017

TWOBROS.COM  MADE IN THE USA

©1985-2017 TWO BROTHERS RACING, INC. TBR PRODUCTS ARE INTENDED FOR CLOSED COURSE COMPETITION ONLY. NOT LEGAL ON PUBLIC ROADS, STREETS, OR HIGHWAYS.

## COMPANY HISTORY

In 1995 we decided to go racing.

Two Brothers Racing hit the track and immediately we knew we wanted more than what stock components could deliver. So we tweaked. We built. We engineered. And soon Two Brothers Racing grew into a factory-backed AMA Superbike team delivering national championship-winning race machines.

Today, TBR creates V-Twin systems that are specially designed to meet the style and performance demands of these unique machines. The Comp-S exhaust system provides increased horsepower and torque, while reducing overall weight. All without sacrificing durability. Raised ground clearance allows riders to maintain higher speeds through corners and the fit has been optimized for both forward and mid controls. Each weld on our stainless steel system is hand crafted to perfection, and the intake and header additions will give you the edge and performance you seek.

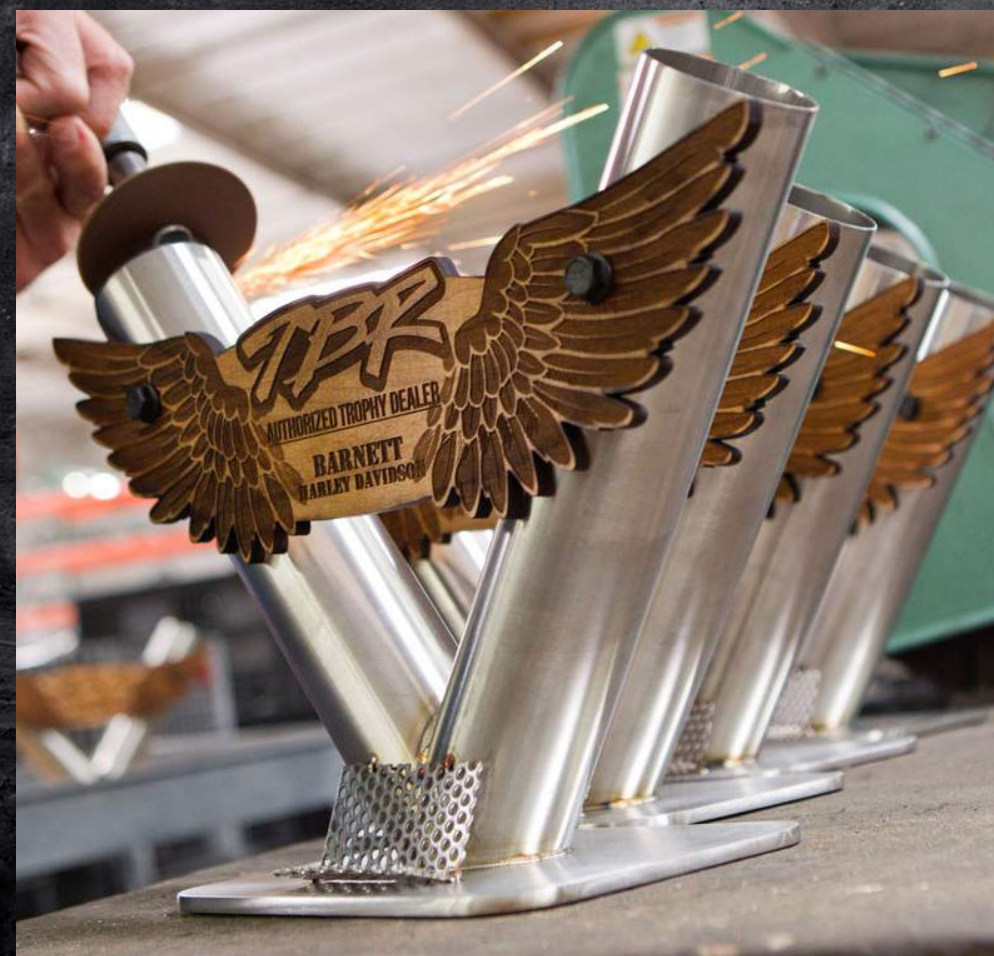

Bolt one on today to see, feel and hear what you've been missing.
