

CORD-LOX®

Y SERIES

(step 1)

(step 2)

(step 3)

(step 4)

The Y Series models are our easiest to use. There is virtually no excess overlap, and we have sizes to fit everything from a skinny wall wart cable to a 100 foot audio snake. Like our other models, these stay on your cord until you remove it.

Simply place your cord or cable between the “Y” end (step 1), overlap one side over the other (step 2) and press to secure (step 3). Then, coil the cord, wrap the Y Series Cord-lox around and secure it (step 4).

As always, custom colors, sizes and logo printing are available.
