

Instructions for fixed appliances

Instructions for fixed appliances

You have now completed your Orthodontic Treatment and will need to follow the instructions below to care for your fixed appliances.

- Your appliance is to be treated carefully. Avoid food that may damage the brace for example toffees, chewing gums or hard sticky foods. Avoid drinking sugary & fizzy drinks.
- It is likely for the first few days your teeth may feel tender or uncomfortable. However this will wear off and you will quickly get used to the brace.
- It is important to keep your brace and teeth spotlessly clean. If possible carry a brush with you to use after mealtimes. Plaque and food left around the brace can cause permanent damage and lengthen your treatment duration.

- Breakages of the brace will increase your treatment time. If you break your brace repeatedly your brace treatment may be stopped.
- Keep your regular dental check-up appointments with your dentist.
- It is advisable to wear a gum shield if you play contact sports.
- You will need regular orthodontic appointments during treatment for brace to be adjusted.
- Follow the instructions of wearing the elastics when required during treatment.
- If you have any questions about your fixed appliance please contact our nurse on 01706 645125 Monday to Friday 9am to 5pm.
