

Light up life.

Hi, we're  
**MPOWERD**

MPOWERD

## Nice to meet you

We work hard every day to make clean energy products that are affordable, easy to use and good for the earth - that's why we created Luci inflatable solar lights.

# Meet Luci

The little light that's like no other.

## Light never looked this good

Streamlined design features make Luci clean and sleek, with all the functional durability you'll ever need. Plus it's waterproof, lightweight and lasts up to 12 hours on a single charge.

## Just add sun

That's it. Luci is completely solar with a built-in rechargeable battery that lasts for hours.

## A compact little light

Luci collapses to just one inch, so you can pack it up and take it with you wherever you need light.

The little light that  
does BIG things

# The little light that loves the great outdoors

Tough, lightweight, and lasting for up to 12 hours on a single charge, the Luci Outdoor inflatable solar light is the perfect travel companion, no matter where in the world you end up together.

A group of people are seated around a wooden table outdoors at dusk. The scene is filled with numerous hanging solar lights, each with a frosted, cylindrical shade, creating a warm and magical atmosphere. The background shows trees and a sunset sky. The text is overlaid on the left side of the image.

# The little light that turns any hour into magic hour

Beautifully bright with a frosted finish, the Luci Lux inflatable solar light's soft, warm glow can transform any moment into an unforgettable experience.

# The little light that makes a house a home

Add a touch of modern design to your space with the completely solar, safe and versatile Luci inflatable solar light.

# The little light that's the life of the party

With 7 brilliant hues at the push of a button, the Luci Color inflatable solar light elevates your party a level, taking it from everyday to epic.

# The little light that's ready for anything

A pocket-sized lantern, flashlight, and emergency light all-in-one, the Luci EMRG inflatable solar light has got your back when any disaster strikes.

A young girl with dark hair tied back and a large pink flower in it is sitting at a wooden desk. She is wearing a light blue t-shirt and a purple wristband. She is focused on writing in a notebook with a black pen. A small, glowing white cylindrical lamp sits on the desk to her left, providing light. In the background, another person is blurred, also working at a desk with a similar lamp. The wall behind them has some faint, light-colored drawings.

## The little light that empowers

We do things a little differently  
- the more we sell, the more  
we can distribute to those who  
need light most.
