	Green Connector	4

Assembly Instructions

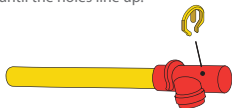

Thank you for purchasing Tubelox. We hope you enjoy using your imagination to create your own play!

Safety Clips

WARNING: Do not sit, stand or play on your Tubelox creation until all safety clips are in place. Safety clips must be put onto each connector and tube hole for a safe and secure toy. Your toy will collapse without the safety clips in place.

1. Insert yellow tube into connector and twist until the holes line up.
2. Place safety clip into both holes.

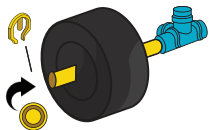

Wheels

WARNING: All wheels must have the safety clips as well as the yellow cap on the end to secure the wheel from rolling off.

1. Slide half yellow tube into wheel hole.
2. Line end of yellow tube with yellow end cap.
3. Securely place yellow end cap onto yellow tube.
4. Secure with a safety clip.

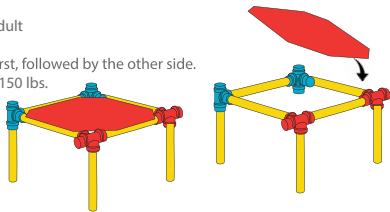

Panels

WARNING: Make sure panels are secure before sitting on your Tubelox creation. If safety clips are not in place, the panels will not be secure. Panels go in tightly, watch your fingers. Do not jump on the panels.

* Panels must be placed with the help of an adult

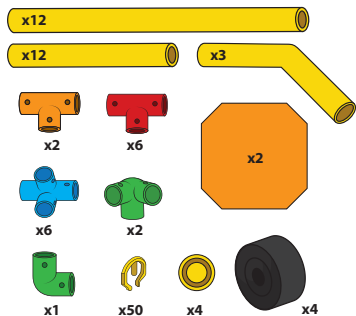

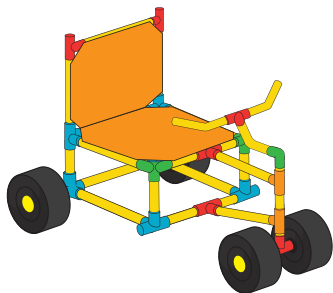

1. Place panel one side of the panel in place first, followed by the other side.
2. The weight limit for sitting on the panels is 150 lbs.
