MealCard Integration

PointClickCare

Organize basic resident information, food allergies, dislikes, diet orders, and more in one easy-to-use program. MealCard provides access to menu and recipe extensions with features ideal for any long term care foodservice operation. Choosing an integration to your electonic health record provides:

REAL-TIME UPDATES

Admission, Discharge, and Transfer (ADT) information transmitted in real-time to avoid errors or missed communications

DATA ACCURACY

Streamlined data sharing direct from the EHR into MealCard prevents data inaccuracies while ensuring essential information is received

OPTIMIZE EFFICIENCY

Dining services teams directly benefit with enhanced communication to improve operational efficiency as well as intuitive cost-saving tools

Health Technologies offers comprehensive menu software solutions to meet nation-wide regulatory standards while providing wholesome menu choices to residents. Food Service Managers are able to customize recipes and menus to further improve resident satisfaction within their community. Software solutions from the Health Technologies program can be tailored to meet diverse dining styles and unique operational goals. Call or email for a personalized demo and quote!
