Service

**Customized Solutions**

## Menu Systems

At Health Technologies, we believe food service is the heart of the community.

Health Technologies offers a variety of customized menu solutions to meet the unique needs of your community. **Dining Manager**, the Health Technologies menu program, is a web-based menu software program with integrated printed **MealCard** and digital **TableSide** systems for resident identification and efficient meal service.

### Dining Manager

Web-based menu technology

Complete recipe database

User ability to create custom recipes

**Menu Planner** feature for easy menu modifications

### MealCard

Resident nutrition profile

Integrated menu from **Dining Manager**

Food preferences and diet order management

Cohesive and streamlined report printing

### TableSide

Restaurant style dining options

Increased customer service

Ensured safety with food texture and allergy alerts

Improved kitchen to dining room communication

One-on-one virtual training provided. Custom on-boarding and training solutions available.

FREE toll-free technical support from the Health Technologies menu team.

*Call or visit **DiningRD.com** to schedule a demonstration!*
