

# TableSide

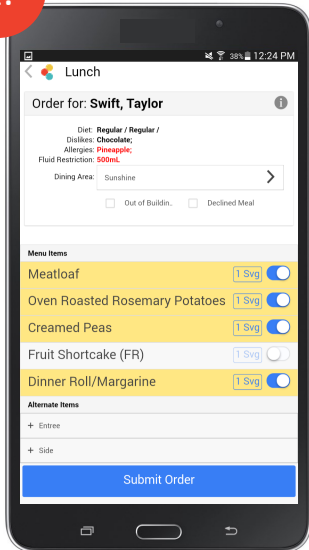

for Dining Manager

Digital restaurant-style dining for Long Term Care  
Allergy and dislike ingredient recognition with integrated diet order

Improve Resident Satisfaction • Expand Dining Operations  
Increase Staff Productivity • Monitor Food Production and Cost • Streamline Communication

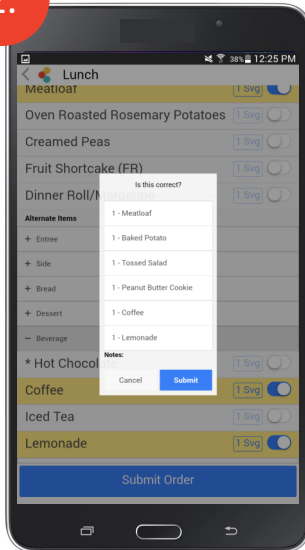

1.

Restaurant menu selections are offered for each individual as they are seated in the dining room

2.

Menu choices selected by the individual and recorded in the digital tablet are submitted to the kitchen

3.

Menu tickets are automatically printed in the kitchen for immediate production and service to the dining room

Corresponding menu tools and production reports for seamless operational control

After implementing TableSide, Long Term Care Communities reported:

- Elimination of commercial supplement usage
- Improved weight loss stats amongst residents
- Overall decrease in food cost

Features:

- Customizable menu
- Integrated diet order
- Responsive notifications for dislikes and allergies
- Guest ticket ordering
- Production reporting
- Meal tracking for MDS reporting
- And more!
