Skincare:

Here at London Road Beauty, we combine advanced techniques and expert advice to give you vibrant and healthy skin.

We have specially designed a menu of advanced facials to leave your skin plump, toned and quite simply radiant. No matter what your skin type is, we can tailor to your skincare needs. We are passionate about sharing our knowledge to create the most effective treatment plan for you which will have your skin looking and feeling healthier than ever.

Skin Consultation & Taster Facial (60 mins): £45

Every skin type and condition is unique. We do not offer a one size fits all approach as this will not get us the results you need.

Consultations are a key part of all skin and health concerns. A consultation with a taster facial will enable us to focus on different areas to help you get on the right track for your skin and wellbeing and enable you to try out an advanced facial.

A detailed treatment plan, product recommendations and skincare tips will then be sent to you so you can get started on your skincare journey to ultimate skin health!

Environ Facial Treatments:

The Environ® Facial is so advanced that a one-hour treatment is equivalent to 77 hours of manual facial massage and allows the penetration of their active ingredients into the skin by 4400%

The pioneering dual electro-sonic technology sets the benchmark for professional skincare treatments. Low frequency sonophoresis (soundwaves) together with pulsed iontophoresis (current) along with Environ's professional skincare products, is why the award-winning Environ Facials are said to be the most technologically advanced facial treatments in the world.

These facial treatments are customised and can help improve sun damage, fine lines, sagging skin, dehydration, sensitivity, redness and pigmentation. The Focus-On Treatment can be specially developed to target specific areas of the face.

Express & Head Massage (50 minutes): £50

Environ Cool Peel Treatments:

Environ's unique cool peel technology is a non-invasive intelligent skin renewal system that helps to safely and effectively refine, revive and brighten skin.

This treatment is customised to assist with reducing the appearance of premature ageing, as a moisture boost, deep cleansing, brighten complexion, for blemish control or to restore skins glow, uneven texture & tone.

Vibrant-C Mini Cool Peel (45 minutes): £70

This cool peel is called Vibrant-C and targets pigmentation & sun damage.

Mini Cool Peel (75 minutes): £75

A one-off mini cool peel is more intensive than a facial treatment and can focus on - deep cleansing (for congestion & blackheads), moisture boost (for dry/dehydrated skin) or bright recovery (for superficial pigmentation or dull tired skin)

Environ TCA Cool Peel Treatments:

The TCA Advanced Cool Peeling System uses TCA (Trichloroacetic acid) a chemical peel that can treat a wide range of skin problems such as:

- visible signs of ageing, photodamage, acne, rosacea & scarring
- A unique safe comfortable peel that comes without complications to trigger growth factor production.

it is recommended the TCA Cool Peels are done as a course of 6 peels (over a 6-11 week period) or 12 peels (over a 12-20 week period) and the client must have been using an Environ Vitamin A moisturiser for a minimum of 3 weeks prior to the start of the first peel.

Dermalux Triwave MD Treatments:

The Dermalux Tri-Wave MD is an award winning, medically certified LED Phototherapy treatment delivering clinically proven light wavelengths to transform the skin without pain or downtime. When these wavelengths are applied to the skin, they impact on how we look, feel and perform. Phototherapy, like photosynthesis converts light energy in the same way our bodies use nutrients from food. This in turn supercharges cell function and accelerates our rejuvenation and repair processes.

Dermalux delivers clinically proven Blue, Red and Near Infrared wavelengths to boost collagen production, destroy acne causing bacteria, reduce inflammation, accelerate healing and relieve pain, as the light triggers a whole cascade of cell activating processes.
