Hip & Joint Soft Chew **Instruction Guide**

**Petpost Hip & Joint
Soft Chews** are your
new favorite treat
for your dog's hips
and joints. Your new
bag of soft chews
contains lots of good
stuff, but most of all
this bag contains
plenty of good vibes
for your sweet pooch.

Why Use Hip & Joint Chews for My Beloved Dog?

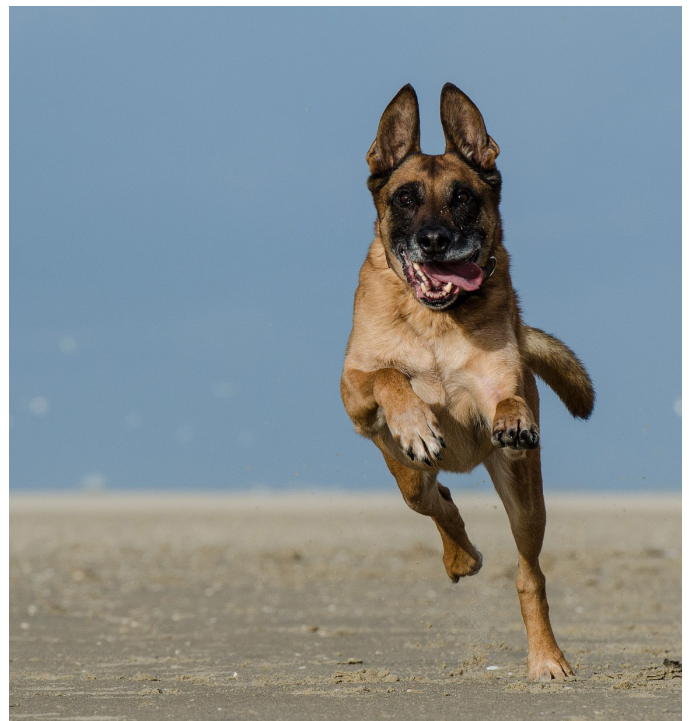

There's no doubt you only want the best for your precious canine friend, and giving her the most rambunctious playtime and lots of activity is probably the highlight of both of your days. As time goes on, however, Fido's hips and joints can take a beating. Difficulty running, getting up from a down position, or climbing stairs are pretty good signs that your dog might be struggling with hip and joint issues. You can just imagine the inflammation, pain, and sadness that your pup must be feeling.

So send the army in! You have already made the right choice by choosing Petpost to replenish the numbers and pump up your pet's hips and joints with Glucosamine, Chondroitin, and MSM.

But there are many different brands of hip and joint supplements for dogs right? Well, here's the thing: just because a product contains Glucosamine does not mean that it's effective for your pup. Some may claim to contain a lot of good ingredients (and they may be telling the truth), but most don't contain a diverse, powerful mixture of Glucosamine, MSM, and Chondroitin.

And that's why we're here. We want to create a product that ensures our own dogs' live happy and healthy lives with LOTS of running and playing. No other company can match our powerful formula.

Petpost's Hip and Joint Soft Chews are perfect for you and your pup (and they are really delicious too!) So don't delay - after reading this guide you will be ready to give your pup the best hip and joint soft chew that puppy kisses can buy!

Adding Petpost Hip and Joint Soft Chews into your dog's diet will help support healthy hips and joints, and that means getting the most out of Mr. Pugglesworth's play time — and enjoying many more years of active doggy lifestyle!

Follow these instructions so
that Buster can get back to chasing
squirrels and birds.

Here's what you need:

- **Petpost** Hip & Joint Soft Chews
- A Bit of Patience

Instructions:

The Petpost Hip & Joint Soft Chews are easy and convenient to use. Follow these instructions and in no time your little Pickle will be feeling better and ready to play with the other fur babies.

1. Grab the correct amount of the Petpost Hip & Joint Soft Chews based on the chart to the right.
2. Most dog's love the taste of these chews, but if your dog is skeptical at first, break up the soft chew into small pieces and mix it into Woofy's regular food bowl and he won't even know the the difference... Did you say food?
3. Give your dog the gift of Petpost daily! Remember to be patient. You might not see a change overnight - but over time you should notice a difference in your dog's behaviour and temperament.

Suggested Daily Use:

Up to 25 lbs.	1 soft chew
26 to 50 lbs.	2 soft chews
51 lbs. and over	3 soft chews

The benefits of the
Petpost Hip & Joint
Soft Chews are
most effective when
applied by a loving
dog owner.

From now on,
that'll be you.
