

Petpost!

Snout Balm for Dogs Instruction Guide

Petpost Snout Balm
uses natural and
organic ingredients to
heal dry, cracked, itchy,
or infected noses.

So far, though, we
haven't figured out a
way to get your dog to
apply it himself.

Does Your Beautiful Bella Have Irritated, Dry, Or Cracked Snout?

Lots of dogs have problems with cracked or chapped noses, especially in the winter. That's why we developed this unscented Snout Balm for dogs.

Many other snout balms are messy, requiring you to dig your fingers into a tin to smear it on your dog's nose. Our handy applicator offers you a convenient, mess-free way to soothe, heal, and protect Penelope's nose.

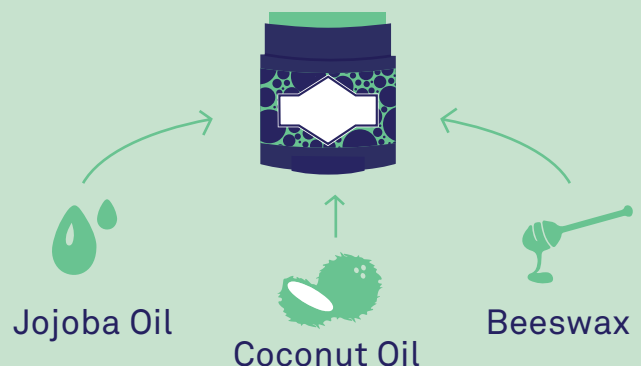

Whenever possible, we use ingredients that are organic, including organic coconut oil, organic jojoba oil, and organic beeswax. This makes our snout balm gentler than ones made from harsh chemicals. Our Snout Balm is also unscented so it won't bother Fluffy's nose!

We're an environmentally conscious company, so our paw balm is made in the United States with naturally-derived ingredients and recyclable packaging, so it's good for the environment and good for your dog.

Why is my dog's nose cracked?

Lots of things can cause your dog's nose to be dry, cracked, or crusty. Dry weather, allergies, or hyperkeratosis are just a few things that can irritate SillyFoot's sensitive snout. Luckily, Petpost Snout Balm can start to soothe your pooch's nose in just one application.

Dry snouts are no match for the natural power of Petpost!

Follow these instructions to provide instant relief for Pogo's sore snout.

Here's what you need:

- **Petpost Snout Balm**
- **About 5 Minutes**
- **A Good Distraction for Your Dog***

* Our Snout Balm works best if your dog leaves it on his paw pads. You should spend several minutes after application distracting him from licking it off.

Instructions:

The Petpost Paw Balm is easy and convenient to use. Follow these instructions to help soothe and heal your dog's paw pads.

- 1.** Gather your supplies! In addition to the Petpost Snout Balm, you will want a handy way to distract your dog from licking the balm off his nose. You don't want to give him time to lick his snout while you try to find a treat or a toy.
- 2.** Uncap the Snout Balm and rub the product directly on the outside of your dog's nose. Apply generously, making sure to give special attention to any extra dry spots that you can see.
- 3.** Place the cap back on the Snout Balm and immediately distract your dog. His first instinct will be to lick the strange (and apparently delicious) new stuff off his nose, but it won't help nourish your dog's skin if he licks it all off.
- 4.** Some ways to distract Sparky include giving him a bully stick or frozen kong, or simply playing with a chew toy.
- 5.** Keep your dog distracted for at least 5 minutes to prevent your dog from licking off the Snout Balm while it settles into the deepest layers of your dog's nose skin.
- 6.** Use daily until your dog's snout looks and feels healthy, then apply several times a week to keep Fred's nose in optimal condition. If your dog is suffering from noticeably dry, cracked snout, you should see the results in the first few uses. But don't stop - we recommend continuing to use the Snout Balm daily until Buster's nose is good as new.

FAQ:

The Petpost Snout Balm is pretty straightforward, but there are a few questions that frequently come up. This should help you answer most of the questions that you have.

Q: How long until I see results?

A: Well, that really depends on Fluffer-Nutter's specific situation. If your dog is suffering from serious cracking and dry nose or hyperkeratosis, it might take up to two weeks of daily use before you see the full results. Other dogs with only minor dryness or irritation will see significant results within the first few uses. We recommend using the product daily until your dog's snout is good as new, then you can lower down your treatment to just a few times per week.

Q: How do I distract my dog while the Snout Balm soaks in?

A: There's a few great methods to distracting your dog while the Snout Balm soaks into Winnie's nose and nourishes her skin. Our favorite distraction is simply giving your dog an extra delicious treat that distracts her for a few minutes. A peanut butter filled bone is a great, time consuming treat, but a bully stick or other chewy food will work too. If your dog is not very food motivated, then pull out your dog's favorite tug toy, chew toy, or squeaking plush toy for a round of tug. Neither of these are working for you? How about trying the most coveted form of doggy affection: the belly rub!

Q: Should I rinse with water after using this product?

A: Nope! We want your dog's snout to absorb as much of the good stuff as possible, so there is no need to rinse!

Q: This product isn't working for me, what should I do?

A: This product works for most dogs. In almost every case that this product doesn't work, it is because of inconsistent use, or a lack of distraction for your dog which prevents the soothing ingredients to fully soak in. The best thing you can do for your dog is use the Snout Balm daily, and distract your dog for at least 5 minutes after every session. If you are consistent and patient - this product will work for you! We are so sure of it, that we offer a 100% money-back guarantee if your dog's snout doesn't improve after following the directions carefully. If you feel like this product did not work for your dog, then just send us an email and we will make it right.

Now that Prince's snout is looking and feeling a lot better, here are a few more pieces of advice for you:

- Make sure your dog is on a healthy, natural diet with plenty of nutrition. High-quality dog food and daily supplement treats can do a lot of good for J.K. Growling's hygiene and overall health.
- Get stainless steel, glass, or porcelain food and water bowls to reduce the amount of toxins that Moxie can consume. Plastic containers can harbor bacteria that may irritate or infect Mr. Snugglepuss.
- Continue using your Petpost Snout Balm regularly. This product will help soothe and protect your pup's nose from dryness, irritation, and hyperkeratosis.
- The ingredients in this product are: Organic Jojoba Oil, Organic Beeswax, Organic Coconut Oil, Organic Grapeseed Oil, Organic Hempseed Oil, Organic Shea Butter, Mixed Tocopherols, Organic Rosemary Extract, Organic Calendula Extract.

The loving formula
we crafted for the
Petpost Snout Balm
nourishes your
pup's nose most
effectively in the
hands of an equally
loving owner.

From now on,
that'll be you.
