Tear Stain Soft Chew **Instruction Guide**

Petpost Tear Stain
Soft Chews' blend
of safe-yet-powerful
ingredients makes it
a uniquely effective
long term remedy for
tear stains. These
chews are good for
your pup's fur, health,
and happiness.

So your precious little Pickle is suffering from unsightly tear or mucus stains?

Don't worry, it's extremely common in dogs, especially in smaller, white breeds such as the Maltese, Shih Tzu, Westy, Poodles, and Bichon Frise.

Our journey started in August of 2015 the makers of the leading tear stain removal products were caught by the FDA for containing an unauthorized antibiotic. Angels' Eyes, Angels' Glow, and Pets' Spark were all found to contain the antibiotic tylosin tartrate, which is not approved for use by the FDA in dogs or cats.

Not only is using chemicals potentially harmful to Sir-Barks-Alot's health, but it is also bad for the environment and the people around you.

Once we realized that there is a problem, that's when we got to work. There must be a safer, more natural solution to tear stains.

But what causes tear stains?

The root of almost all tear staining is epiphora, which is excessive tear production. The iron rich tears create reddish brown stains underneath a light colored Mr. Fluffy's eyes or mouth, which are usually an unsightly and difficult to maintain nightmare, until now!

What makes Petpost different?

Petpost takes your dog's safety seriously. We use only the highest quality, FDA approved ingredients and manufacture our products in NASC approved facilities right here in the USA.

Follow these instructions to give Buster some relief from his embarrassing tear stains.

Here's what you need:

- **Petpost** Tear Stain Soft Chews
- A Little Bit of Patience*

*The Petpost Tear Stain Soft Chews take 6-8 weeks before you will see full results. To speed up the process, use this supplement in combination with other Petpost tear stain products.

Instructions:

The Petpost Tear Stain Soft Chews are easy and convenient to use. Follow these instructions and in no time your little Pickle will be sparkly clean and ready to play with the other fur babies.

1. Grab the correct amount of the Petpost Tear Stain Soft Chews based on the chart to the right.
2. Most dog's love the taste of these chews, but if your dog is skeptical at first, break up the soft chew into small pieces and mix it into Woofy's regular food bowl and he won't even know the difference... Did you say food?
3. Give daily until tear stains subside, then continue use for an additional month. If tear stains begin to form again, restart the treatment cycle.
4. There is no instant cure for tear stains. This product works from the inside out, treating the vitamin deficiencies that cause tear staining in the first place. It will take **6-8 weeks** to see full results.
5. Use with Petpost's Tear Stain Remover Liquid or Wipes and Tear Stain Comb to see better, longer lasting results for your lovely dog more quickly.
6. In no time Polkadot will have clean, fresh fur around the eyes and be back to the dog you knew she was!

Suggested Daily Use:

Up to 15 lbs.	1 soft chew
16 to 50 lbs.	2 soft chews
51 lbs. and over	4 soft chews

Now that you and Pancake are looking a lot better, here are a few more words of advice:

- In addition to using these soft chews daily, make sure your dog is on a healthy, natural diet with plenty of nutrition. High quality dog food can do a lot of good for J.K. Growling's hygiene and overall health.
- Get stainless steel, glass, or porcelain food and water bowls to reduce the amount of toxins that Moxie can consume. Plastic containers can harbor bacteria that may irritate or infect Mr. Snugglepuss.
- Make sure to use the Petpost Tear Stain Remover Liquid or Wipes to regularly clean your dog's fur. All of our products are made from the highest quality ingredients and are perfect for preventing future tear stains from forming.
- The active ingredients in this product are Cranberry Extract, Oregon Grape Root, Vitamin C, Eyebright Herb Extract, Marshmallow Root, Linolenic Acid Omega 3, Lutein, and Linolenic Acid Omega 6. We take the quality of our ingredients and your dog's safety very seriously. If you have any questions about our facilities or the ingredients in our products, feel free to contact us directly - we will be happy to help.

The loving formula
of **Petpost** Tear Stain
Soft Chews get rid
of ugly stains most
effectively in the
hands of an equally
loving person.

From now on,
that'll be you.

Petpost!

**Thanks for supporting our mission to keep
every dog clean, healthy, and happy.**
