EXPERTS IN LIQUIDS PROCESSING FILTRATION AND BOTTLING

Product ref. CA – 01

Date: 28/04/22

## Manual Crown Capper

Crown caps are placed in the magnetic capping head, a bottle is positioned underneath, and pulling down on the lever applies the crown.

Easily adjustable for different bottle heights and diameters, comes with interchangeable 26 and 29mm heads.

Attachment available to convert machine to push in 'T'corks (stopper corks)

Heavy-duty, robust construction and surprisingly quick and easy to operate.

Speed 500 to 1,000 bottles per hour

*Designs may vary*
