

Addition

In this lesson, children will practice addition using Eco-bricks[™] Color.

0-30min

Small Group Activity

K-1st Grade

Teacher Support:

Key Objectives:

- Child will use Eco-bricks[™] Color as math manipulatives
- Use this activity in a Math Center

Materials:

- Eco-bricks[™] Color 86 Piece Set
- Addition Worksheet
- Writing Utensil

Lesson Activity:

- Addition is fun with Eco-bricks[™] Color! Today, we'll be using construction blocks as our math manipulatives in center activities today!
- Have Eco-bricks[™] Color construction blocks in a basket next to the Addition Worksheets in your Math Center.
- Students will find the corresponding blocks from the construction block bin and set them on top of the block pictures on the worksheet.
- Students will then use the blocks to help guide them through and solve the addition problems.

*As an early finisher activity, the student can also create their own math equations! Have the student place out and solve their own addition problems with blocks from the bin.
