Ron @ 888-310-4001 or
ron@minordecliner.com**

**Always verify Tablet correct DATE. Needed to
calculate AGE correctly**

**ID Scanning to check age is free and unlimited.
Please see page 11-18 about Fake ID Checking
and 6 free fake scan credits. Internet is needed
for Fake Checking**

Important Notes

Correct Drivers License Bar Code to Read

Sometimes there are several barcodes to read on Drivers license

This varies state to state. Please scan the **PDF417** barcode as shown below

Please line up the scan so the blue triangle / red line is at the center of the correct bar code

If necessary, cover the others with your thumb or finger to insure you are reading the correct barcode.

1. Its ok to keep the plugged in and on
2. **Important > Hold license approx. 3" from scanner**

PDF code
Facing Scanner
Back of ID

Easy Set up

Step 3 : Turn on Tablet

Step 2

Verify Scanner

Connected to USB Port
2nd Port From the power cord

Step 1

Plug power cable
Into tablet in

After you have worked with the system for a while, consider using a Velcro Strip to make sure the tablet does not get accidentally knocked off your counter.

If one is not in your Box, contact us and we will send you one for Free!

**#2 – Apply as shown
Don't block vent holes**

#1 – Cut Strip in ½

MinorDecliner

Thank you for your order!

If you have any questions as you install and implement your new age verification system, view our Product Tutorial Videos:

Scan for Product Support Videos:

Thank you so much for purchasing your system!

We are a small US based family business, and we do everything we can to answer questions and provide great support! For any questions or assistance at all, please call us @ 888-310-4001 or email @ ron@minordecliner.com
We will contact you asap to resolve your issue or question.

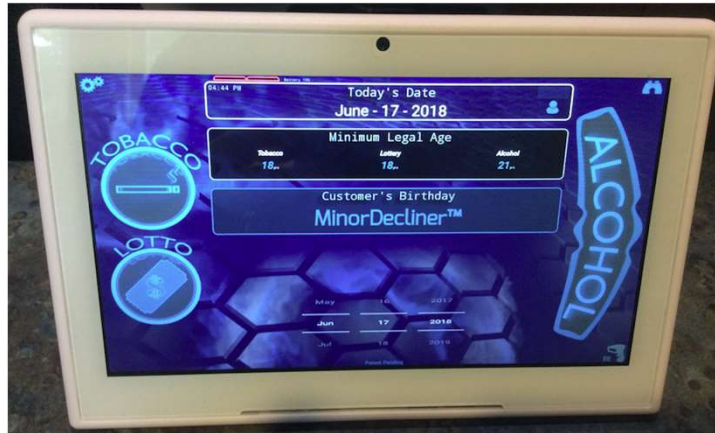

Common question #1 – The scanner not scanning an ID.
If the scanner is not reading the ID, watch the video – it’s a quick fix
If you still need help, call or email as above.
We like to do video calls to troubleshoot, so let us know if you have apple or android phone for the video call.

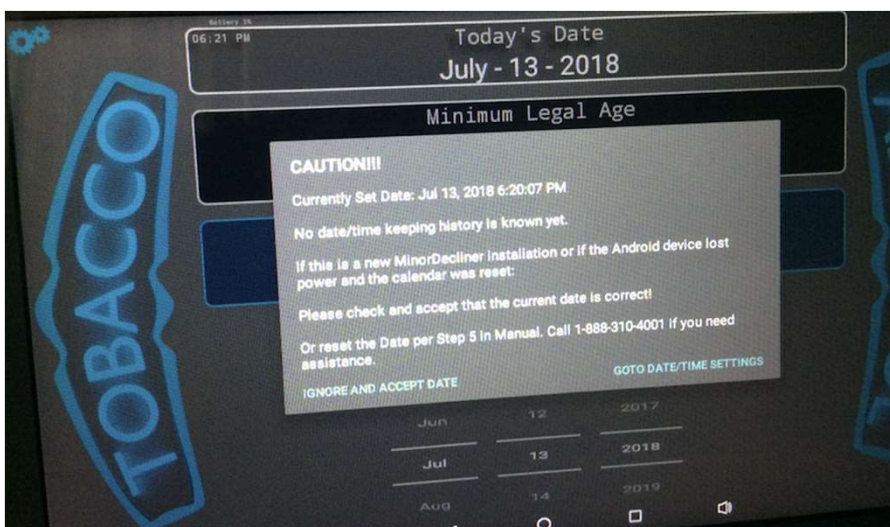

Easy Set up

Step #	Instructions	Image
4	Screen with Minor Decliner Icon will appear , touch Minor Decliner to open the app	 A screenshot of an Android home screen with a blue background. Two app icons are visible: 'Minor Decliner' with a blue circular icon containing a white lightning bolt, and 'Settings' with a white gear icon. The status bar at the top shows signal strength, Wi-Fi, and battery icons, along with the time 7:18.
5	If you see this, touch "Use by Default" to get a check mark, then touch OK	 A screenshot of an Android permission dialog box. The title is 'Minor Decliner' with a blue lightning bolt icon. The text asks 'Allow the app Minor Decliner to access the USB device?'. There is a checked checkbox next to the text 'Use by default for this USB device'. Below this, it says 'Clear default in System settings > Apps > Downloaded.'. At the bottom right, there are two buttons: 'CANCEL' and 'OK'.

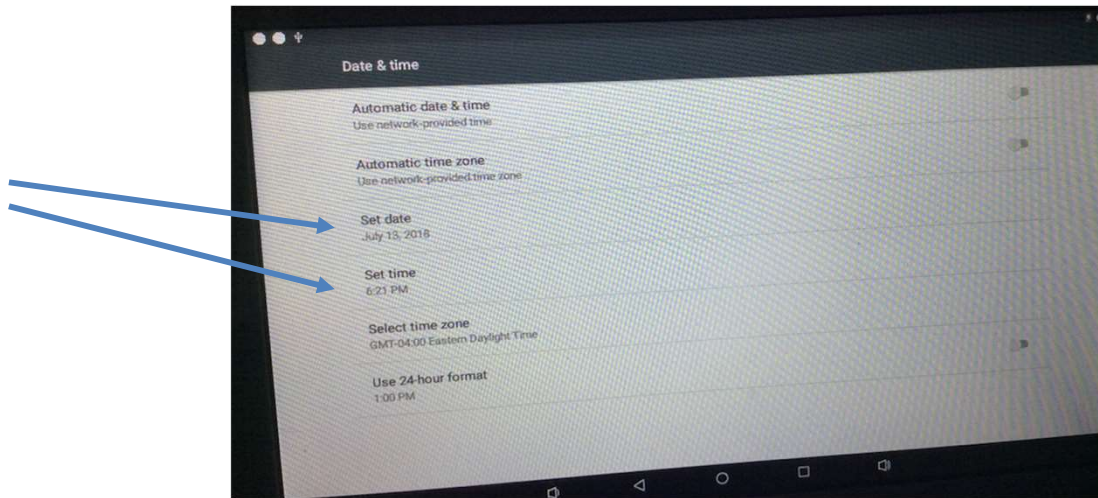

Step 6 : The screen below will come up.

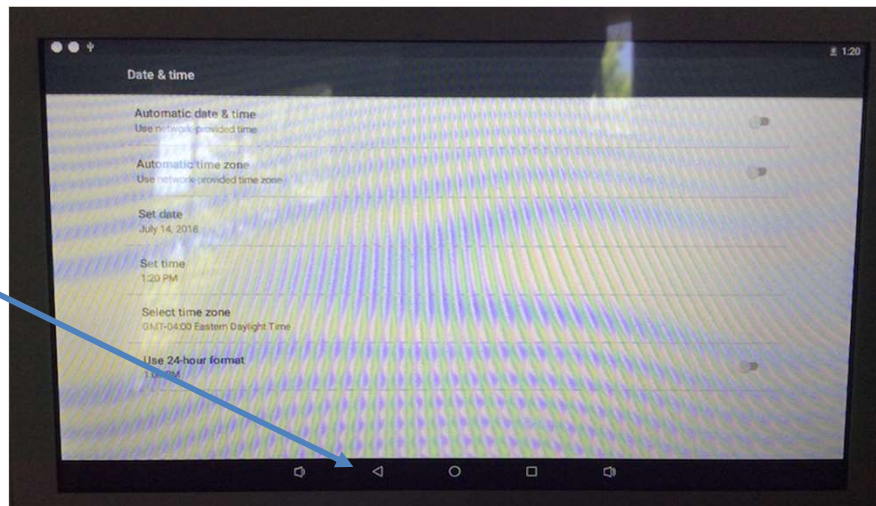

Step 7 : Minor Decliner may ask you to verify the date / time with the pop up below

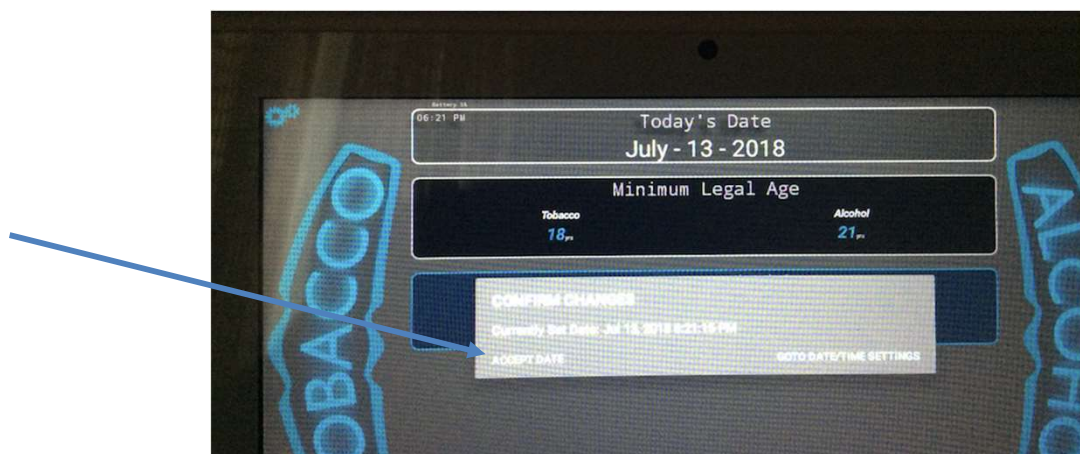

Step 8 : Set / Verify Date time

Step 9 : Touch the Back Triangle

Step 10 : Verify then accept date

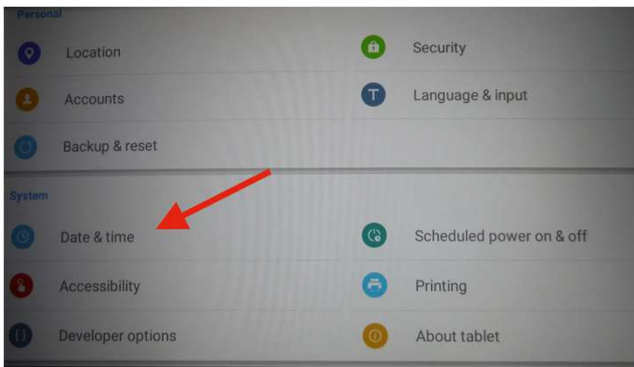

How to the Date / Time from Settings - Always check DATE / TIME on extended power down of the system.

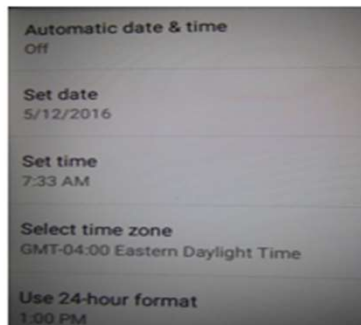

Touch the Center – “Settings” Icon

Scroll down until you see Date / Time. Touch this

Automatic Dates time should be off – we use the internal clock of the tablet

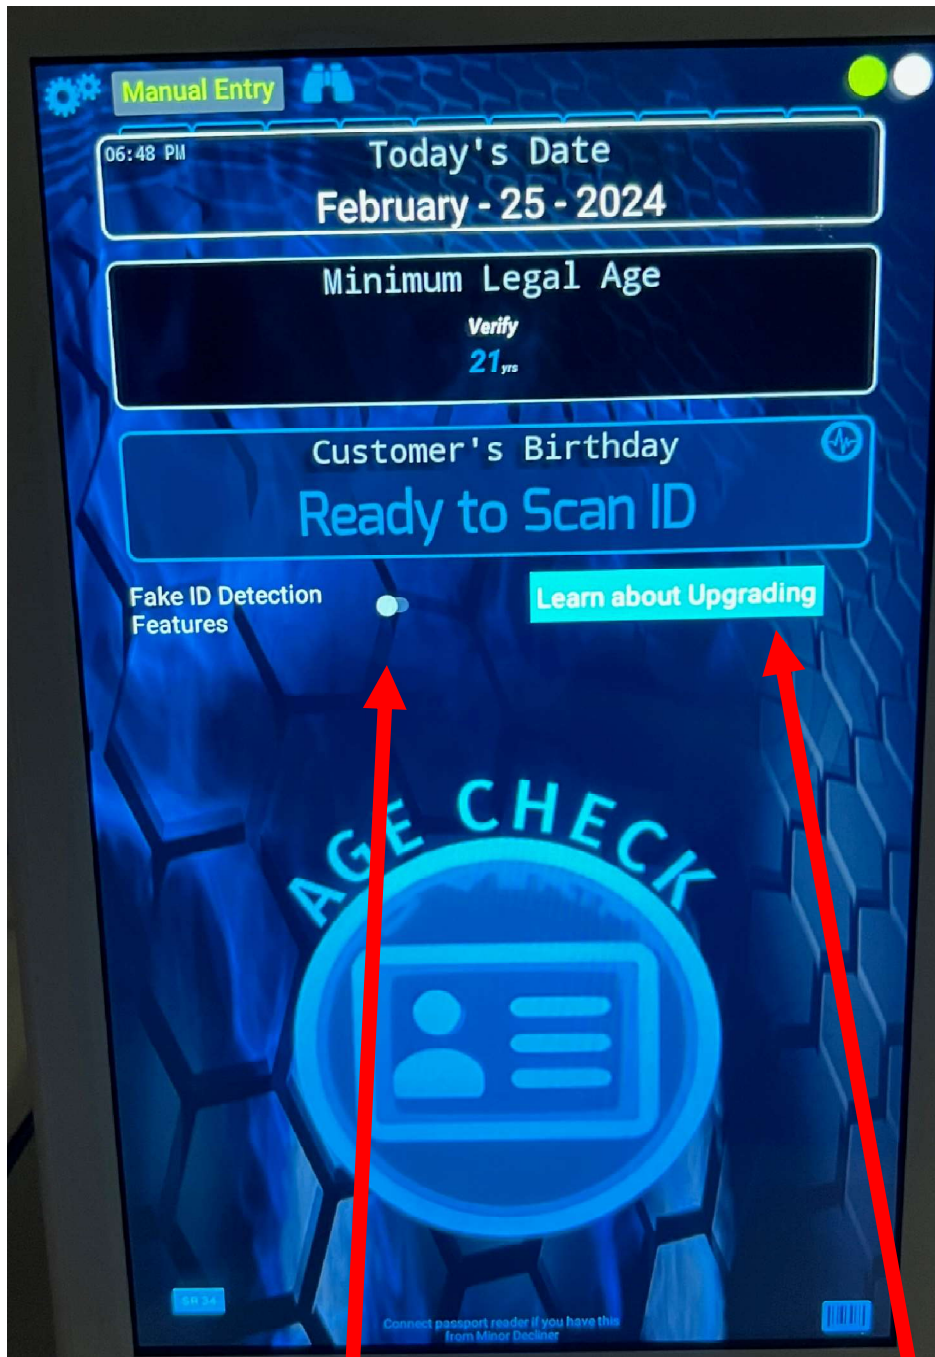

Now set the Date time –

Exit by pressing the back triangle 2 times,

Fake ID

- With Fake ID on, out of the box the system will present questions, after a scan. You can pass / fail based on customer answers to these
- If you want something more definitive see page 13 about the intellicheck option.
- This is active with 6 free check credits This finds 90% plus of fake IDs. Requires WIFI connection.

6 Fake Check Credits included And activated

Fake ID Checks Powered by

You can **upgrade** this system to include World Class ID checking with Intellicheck.

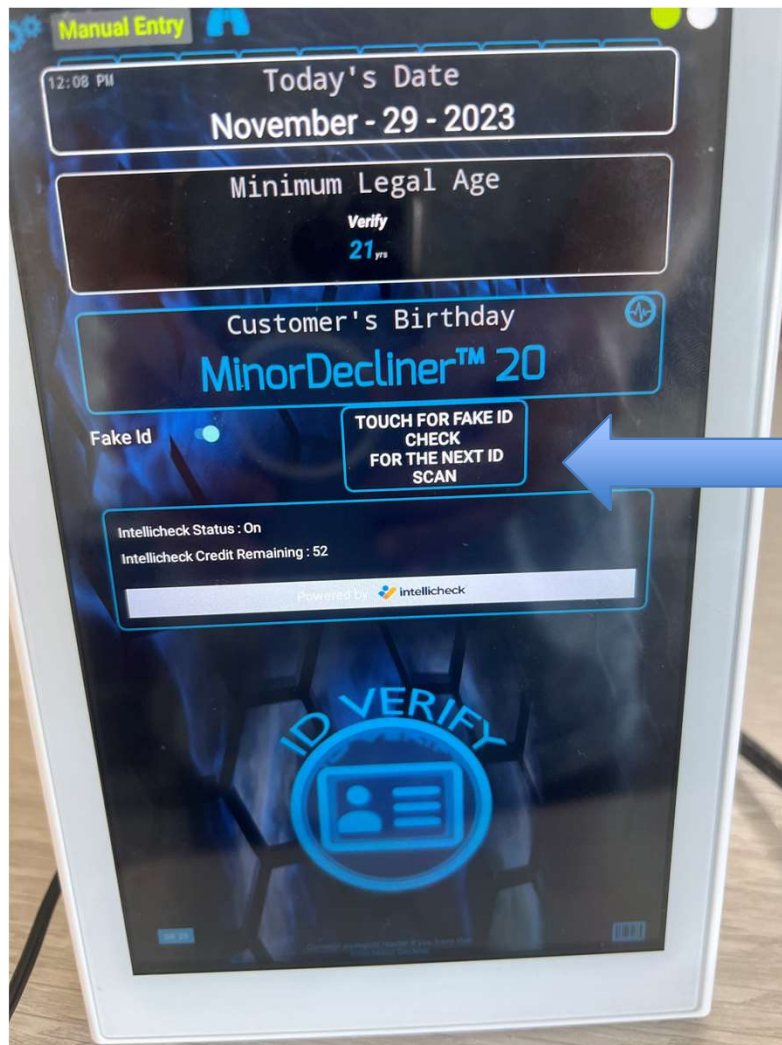

This is considered the gold standard in Fake ID detection and is used by Police Departments and large banks and financial institutions. Now you can have this “Police Grade” fake id checking machine in this easy-to-use handheld system. No **Fake ID detection** is perfect, but based on our testing and other studies, we feel the system will detect 90% of Fake ID’s.

If you are interested in learning more about this, Email @ ron@minordecliner.com, or call us at 888-310-4001

Note – **requires WIFI connection and Fake check credit purchase (beyond sample credits)**

6 Fake Check Credits included

And activated

**Each time you use a fake check, a fake
check credit is consumed**

Intellicheck Results

Authentic ID

Authentic ID and Over 21

“Document Process OK”

“PASS”

Fake ID

“Document Unknown”
Or
“Data Issue”

RED Caution is a FAIL

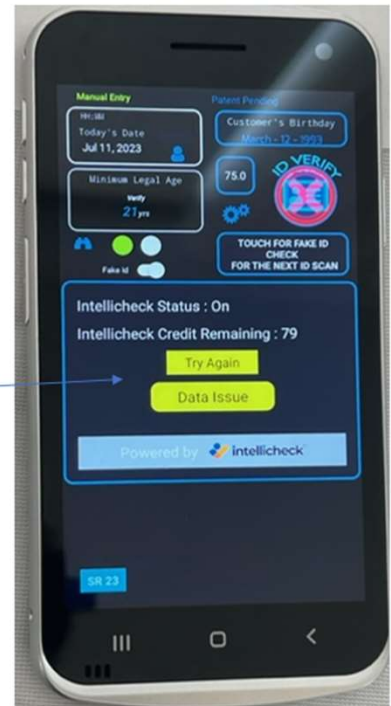

Data Transmit Issue

The data did not transmit to Intellicheck correctly

Redo / Try again if desired

Repeat data issue is likely a fake or
Could be internet connection issue

Document Error

Intellicheck was able to process the scan,
But it was not as expected. This somewhat of a catch
all error category. Appearance of this should be rare

Redo / Try again if desired

Expected Accuracy of the Fake Check System

The Minor Decliner Plus Solution, powered by Intellicheck

Minor Decliner has partnered with Intellicheck to provide world class Fake ID detection incorporated into Minor Decliners world class ID Scanners.

Intellicheck is considered the gold standard in Fake ID detection, used by Police Departments and large banks and financial institutions.

Now you can have this “Police Grade” fake id checking in an economical, easy to use handheld system.

No Fake ID detection system is perfect, but based on our testing and other studies, we feel the system will detect **90%** of Fake ID's

In statistics, or any type of evaluation there are two types of Errors

A **Type I error** is a false positive conclusion, while a **Type II error** is a false negative conclusion. The chart below illustrates this

		The Truth about the ID	
		The ID is REAL	The ID is Fake
What Intellicheck Said	Intellicheck Judgement	Accurate Result	Type 1 error – False Positive
		Type 2 error – False Negative	Accurate Result

Recognizing the reality of Type 1 and 2 errors

- We have designed an easy to use, optional feedback system, to allow for feedback from expert evaluations of ID's
- If an expert disagrees with the Intellicheck result, we can easily capture this info, and periodically provide this to Intellicheck to improve the accuracy of their fake detection algorithm.
- Please note the Intellicheck fake detection algorithm is highly proprietary, patented, secret and confidential to Intellicheck. Minor Decliner does not know exactly how they determine Fake or Real

If you want to register a possible error, and a transaction flagged for later review (#1)

Touch the yellow box
While it is displayed

Approx 10 seconds

Feedback #2

Two Blue boxes will appear below
The Green or Red Result Box
This will appear for 10 seconds only

You can select

1. Intellicheck said pass, but you think it's a fake (False Positive)
2. Intellicheck failed the ID, but you think its ok (False Negative)

Selecting this will log the data in a cloud-based file that can be reviewed, and feedback given to Intellicheck to improve their algorithm

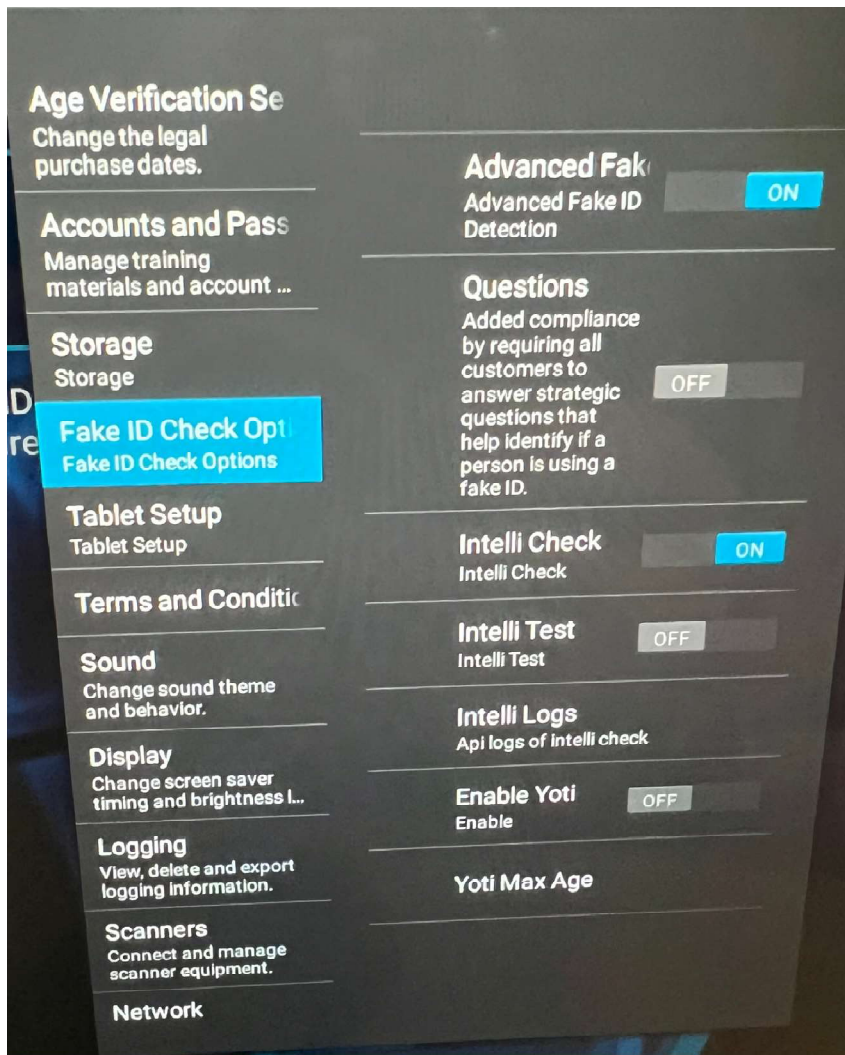

To switch to Fake Questions (after 6 Free Fake Credits)

#1 – Touch Gear (upper LS of screen)

#2 Touch Fake ID

#3

Touch Questions
