Additional Details

Training & Proficiency

Every Pikes Peak V2 rosin press comes with a full detailed manual and most users reach full proficiency using the press within a few hours or less. We'll work with every customer to offer up suggestions and tips on where we've seen the best results so you can get the most out of your press immediately.

Shipping Included

The cost of shipping is included with each Pikes Peak V2 press purchase to the lower 48 states, via freight, which is fully insured. For shipping to Alaska, Hawaii, and international destinations, please contact us for an accurate quote.

Air Compressor & Accessories

An air compressor is required to use the Pikes Peak V2 rosin press. PurePressure recommends an air compressor that can reach at least 145 PSI, has a tank size of 30 gallons or more, and can output at least 1.7 CFM. We also sell top quality air compressors, so contact us to help you find the perfect fit for your operation, even if it isn't from us.

ROI & Pricing

With the Pikes Peak rosin press, a single operator can process over **3.75 lb of flower per day, or 7 lb+ of dry sift or hash.**

Note: these yield figures are variable and are dependent largely on the quality of the materials used.

*These estimates are based on our lab tests involving a single operator at a streamlined work station.

	Equipment Cost	Max Processing Capacity per Press (g) (Flower / Kief & Hash)	Cycle Run Time (minutes) *prep, press, harvest	Runs/Day (8hrs)	Raw Material Processed per Day (LB/day) (Flower / Kief & Hash)	Quality of Flower	Average Yield (%)	Average Yield per Press (g)	Average Yield per Day (g/day)	Raw Material Cost per Day

		35			7	Mid	15%	2.625	252	\$5,185
		Kief / Hash			Kief / Hash	Low	10%	1.75	168	\$3,704
						Dry Sift or Bubble Hash	Average Yield (%)	Average Yield per Press (g)	Average Yield per Day (g/day)	Raw Material Cost per Day
						High	60%	21	2016	\$40,630
						Mid	45%	15.75	1512	\$27,089
						Low	30%	10.5	1008	\$20,000

Small buds, trim sifted kief, non-full melt bubble hash, or virtually any starting material can be profitably pressed into rosin.

Pro Tip: **High Quality = High Yield**
