

# Declaration of FDA Compliance

## Sanitary Tri-Clamp Gaskets

### Included Products

Product diameters offered: 2.0inch, 1.5inch, and 1.0inch

### Statement

This product is intended to assist with water management by sealing clamp connections in sanitary lines.

### Materials

PurePressure declares these gaskets are manufactured with Ethylene Propylene Diene Monomer (EPDM) rubber. EPDM is a synthetic rubber with elastomeric properties; qualities include extreme durability, enhanced flexibility, and high resistance to environmental factors. This material complies with FDA 21 CFR 177.2600 rubber articles intended for repeated use. It also meets 3A Standard 18-03 and passed USP 87 & 88-Class VI Cytotoxicity testing.

### Disclaimers

PurePressure recommends after ice water extraction to thoroughly clean gaskets before each use.

It is the responsibility of the processor that the article is suitable for the intended purpose.
