

Trichome Sifters

Benefits of Trichome Sifters

In-house sifting

Sift profit right out of your trim without having to send it elsewhere.

Hassle-free automation

Automated units take the hassle out of trichome extraction.

Press with ease

Take your sifted kief and press it into rosin with ease.

Gravity & dry ice trichome extraction

GreenBroz's Alchemists utilize a unique cube design featuring premium stainless steel screens to easily and automatically sift trim or flower into kief. Works with or without dry ice.

- Manufactured in the USA.
- Food grade compliant processing equipment.
- Top quality trichome sifting design.
- Premium 100% stainless steel screens available in multiple micron types.
- 180 micron screens come standard, 80, and 130 micron screens also available.
- Guaranteed to maintain stainless steel screen integrity.
- Cleans up in less than 10 minutes.
- Comes with easy trichome collector tray.
- Set-and-forget, timed automated trichome extraction with premium sifting screens.

Multi-type trichome extraction

Original Resinators provide multi-purpose functionality, focusing on CO2 flash-freeze trichome extraction. They can also process bubble hash, fresh frozen material (live rosin), and perform blade-less trimming.

- Manufactured in the USA.
- Food grade compliant processing equipment.
- All-in-one style engineering.
- Multi-function sifter, hash washer, and blade-less trimmer.
- Both Original Resinator units coming with everything you need, including a 3 piece 200, 100, and 75 micron drum sifting screen set and 3 piece 200, 100, and 75 micron resin collection bags (for hash washing) as well.
- Removable screens are easy to clean.
- Ultra high capacity potential.
- Simple to use, high capacity units that perform many extractions well, including trimming.
