

Vinyl Mat Cleaning Instructions

General Cleaning Maintenance

- Your mats should be lightly washed from time to time using warm water (< 130° F)
- Do not soak the mats or leave standing water on the mats
- If necessary, use a very mild, non-abrasive detergent such as Dawn Liquid Dish Detergent and always spot test a small patch first
- A general rule of thumb is one firm squirt of mild soap per bucket of warm mop water
- Always make sure to use a clean 100% cotton mop and ensure it does not have any residue from previous use
- Change out the mop water and mild soap solution when it becomes cloudy or dirty
- Continue to clean the mat surface until the mop water remains clear when wringing out the mop

Dirt and Grime Cleaning

- For heavier duty cleaning of dirt and grime, use a solution of warm water and citrus degreaser such as Zep Heavy Duty Citrus Degreaser
- Mix a solution of 4 oz of citrus degreaser per 1 gallon of warm water
- Do not soak the mat or leave a standing solution on the mat for more than 5 minutes
- Always spot test a small patch first and make sure to use a clean 100% cotton mop and ensure it does not have any residue from previous use
- Change out the citrus degreaser solution when it becomes cloudy or dirty
- Continue to clean the mat surface until the mop water remains clear when wringing out the mop

Mat Disinfection Cleaning

- After cleaning your mat and during use of the mats, be sure to use a surface disinfectant such as Dollamur Mat Cleaner Athletic Surface Disinfectant for disinfection and control of mold and mildew. Follow the directions on the disinfectant cleaner bottle to insure continuous protection.

Contact your Hatashita representative for additional cleaning and disinfecting information.
