

Dictate Anytime, Anywhere.

And Never Worry
About Your
Workflow Again.

OLYMPUS

**Your law firm is busy solving clients' problems.
Let VocalLinks help solve yours.**

**Streamline data sharing and distribution of audio assets
between lawyers and staff for exceptional ROI using Olympus®
recording devices.**

Advances in digital technology within the dictation and transcription process have transformed how law firms process recorded information. Portable handheld recording devices allow attorneys to dictate on the go, and Olympus' ODMS software automatically routes recordings into the firm's workflow, either to a transcriptionist, directly into speech recognition software, or a combination of both. This provides you with a secure, reliable, and flexible way to provide the best client service.

Streamline your workflow & increase billable hours today.

“With Olympus® technology, every case can start with capturing voice and securely routing that file to the appropriate place, whether it be a database or an email.”

OLYMPUS®

The DS-9500 Dictation Device

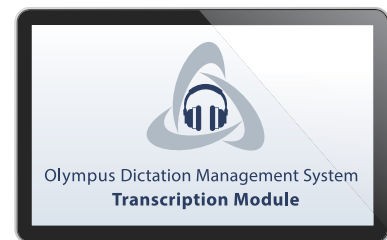

Advanced Wi-Fi technology and a superior noise canceling system make the DS-9500 the ideal device for people on the move. The built-in security and strong body of the DS-9500 make it a powerhouse, while the portability gives attorneys the ability to dictate on the go. With Olympus technology, every case can start with capturing voice and securely routing that file to the appropriate place, whether it be a database or an email.

- Wi-Fi compatible for immediate file sharing
- Intelligent dual microphones suppress unwanted background noise
- 256-bit file encryption
- Olympus Dictation Management System (ODMS) Release 7 software included

The AS-9000 Transcription Kit

Featuring a four-button control pedal, headset, and next-generation ODMS Release 7 software, the AS-9000 seamlessly routes recordings into the firm’s workflow, either to a transcriptionist, directly into a speech recognition software, or a combination of both. Keeping critical recordings safe and private for the attorney looking to provide the ultimate in client service, there’s no more secure, reliable, or flexible solution on the market.

- Efficiently route files within the organization via network server, email, or FTP
- Priority setting configurations for urgent recordings
- Supports web-based email clients, including Gmail and Microsoft Office 365
- Seamless interface with Nuance® Dragon® Speech Recognition software
