A New Perspective on scanning

ScanSnap SV600

Digitize anything with ease

Scan newspapers, magazines or books directly.

Scan anything from business cards to 279.4 x 431.8 mm (11x17in.) size (landscape)* documents

No more hassle to cut or fold documents larger than legal size such as newspapers and magazines, simply position the documents and they can be scanned directly without any extra effort.

* The maximum document size will be 400 x 300 mm (15.75 x 11.81 in.) when the thickness of the document is over 5 mm (.197 in.)
Easily scan thick documents*

Not only bound documents, but also documents with sticky notes or photographs can be scanned directly without any difficulty.

* Maximum document thickness is 30 mm (1.18 in.)
Now scan delicate documents

With "VI technology", scanning can be performed without touching the document. No need to worry about passing your document through a feeder.

A3 size

30 mm (1.18 in.)

New VI technology*

(*VI technology: Versatile Imaging technology)

Equipped with "VI technology" which combines a deep depth of field lens, a CCD linear image sensor and High directivity LED lamp, the SV600 is able to minimize unevenness in image quality and generate a smooth image even when scanning from a distance.

Overhead structure
*Due to the characteristics of overhead scanner, the image quality is different from the past ScanSnap series. Please confirm the image quality of SV600 from Scan-Snap homepage before making purchase.

3 seconds

Deep depth of field lens
Wide auto focus area (even the focusing distance has changed)

CCD linear image sensor
Produce steady images

High directivity LED lamp
Maintain same brightness without affecting by the surrounding

Scan by moving the head

Smooth operation with the support of various functions

SV600 is enhanced with new customized features while continuing ScanSnap the concept of simple, speedy and compact.

Quick Menu saves time!

Quick Menu: Favorites
Icons of frequently used applications are displayed.

ScanSnap's Quick Menu automatically pops up after scanning so you can quickly and easily link the data to an application. Simply choose and click the application icon when the Quick Menu appears.

Enjoy enhanced operability with these two new features:

Quick Menu: Recommended
Icons of the recommended applications are displayed in priority.

Automatically crop several documents with "Multiple Document Detection"*

The one touch/one scan "Multiple Document Detection" feature saves time and hassle by cropping several documents at the same time. Simply place multiple documents in the scan area and let the SV600 intelligently scan and crop your items.

* Up to 10 documents can be cropped automatically. At least 15 mm (.60 in.) is needed between documents.

Fast start up time and scanning speed lead to time saving and efficiency

With a quick start-up time you will be ready to scan in only 3 seconds after switching on the scanner. It also takes less than 3 seconds to scan large 11"x17" documents.

Compact design has small footprint on work space

The compact design gives the SV600 a small footprint taking up much less valuable desktop work space. Unlike a flatbed scanner, space is only needed to place documents when scanning. When the scanner is not in use, the valuable desk space is available for other uses.

Create your own digital books

ScanSnap SV600 is your ultimate partner to scan documents efficiently subject to applicable laws. It comes with easy to use "Rack2-Filer Smart with Magic Desktop" software providing enhanced functionality. With this world class hardware/software combination, you can generate easy to access image files or organize and read your own scanned digital documents.

Step 1

Scan with one touch!
Updated features, allow you to continuously scan multiple pages smoothly.

Page Turning Detection
Automatically detect when a page is turned.

Timed Mode
- Set the time to start scanning after the "Scan" button is pressed.
- (When continuously scanning) set the time interval before the next scan begins.

Step 2

Auto image correction
Image Correction – automatically corrects distortion caused by the curve of an opened document. Confirm and fine tune the scanned images with the preview dialog feature after scanning.

Book Image Correction
You can easily correct distortion of any document.

Point Retouch function
Finger images scanned while holding a document can be easily deleted.

Step 3

Go paperless with digital filing
The new feature of "Rack2-Filer Smart with Magic Desktop", "Easy book creation", is especially added for SV600. You can divide pages and create thumbnail using the scanned front and back cover of the book after scanning.

Rack2-Filer Smart with Magic Desktop

Easy Book Creation

Step 4

Organizing and Viewing on the go
Carry your scanned documents with you anywhere anytime; you can conveniently browse your scanned digitalized document from your tablet or Smartphone. "Rack2-Filer Smart with Magic Desktop" manages and organizes all your scanned images while providing you with excellent flexibility to utilize data in many ways.
