ESSENTIAL OILS FOR ANIMALS

Instructions

ON YOUR DOG'S EAR FLAP

Shake well before use. Spray 1 - 3 pumps on to the ear flap area, and the area around the entrance to the ear canal once to twice a day - or as instructed by your veterinarian.

You are not trying to saturate the ear canal or drip the solution into the ear canal directly.

Coating the outer surface of the ear and upper part of the exposed ear canal, will result in the "traveling" of this solution to deeper parts of the ear.

If needed, gently wipe with a clean organic cotton ball.
