

ALU360 LED PROFILE

ALU360; ø60 mm

We proudly present our new ALU360 profile, which is first extrusion in our wide offer with 360 degree LED's dot free lighting area. It was achieved by accommodating 6 LED strip (up to 5 W/m) on innovative aluminum rails (heavy duty heat sink) mounted inside polycarbonate satin – mat finish diffuser. Hiding aluminum profile inside the diffuser allowed to accomplish another 'LEDs dot free' solution. Trying to satisfy each customer's requirements profile will be available in custom lengths up to 2000 mm. Dedicated components such as anodized aluminum end caps complete our clean design, providing an elegant suspended solution.
