

Our BASIC led profile series for surfaces is manufactured in curved aluminium and available in lacquered white (on demand, we can supply different anodized and lacquered finishes). Ideal for wall surfaces, ceilings, display units, furniture, shelving and similar. The fixing is carried out by means of screws on the base and also with single or double-sided magnetic adhesive tapes.

Suitable for led strips with a maximum width of 35 mm and a power not greater than 35 W/m. Apart from the flexible led strips, also rigid ones can be combined with this profile.

In order to obtain a more homogeneous illumination, while also making the light dots invisible, we recommend the use of our Canovelles/Barcelona/Gomera led strips.

We offer a 2 year guarantee on our profiles and diffusers.
