

Device Manual

3

- DIMMER+CASAMBI
- DC input: 12-24 Vdc
- Command: APP Casambi
- N°2 Output channels
- Control: Dimmer White and Tunable White
- Constant Voltage output for Common Anode applica ons
- Voltage Output for R loads
- Memory Func on
- Adjus ng the brightness of white light, monochroma c colour and CCT for Tunable White light
- Crea ng mul ple scenes and selec ng circadian rhythm
- Adjus ng the brightness up to completed o
- So Start and So Stop
- Typical e ciency > 95% 100% Func onal Test

CONSTANT VOLTAGE VARIANTS

CODE	SUPPLY VOLTAGE	CHANNEL	OUTPUT	COMMAND	
D80x18-1224-2CV-CBU	12-24 Vdc	2	2 x 4A (max 4A Tot)	APP CASAMBI	

D80x18-1224-2CV-CBU is delivered ex factory with TW Fixture as default se ng.

PROTECTIONS

OVP	Over Voltage Protec on 1	
RVP	Reverse Polarity Protec on ¹	
IFP	Input Fuse Protec on 1	

TYPE OF CASAMBI FIXTURE

FIXTURE	SUPPLY VOLTAGE	OUTPUT	CHANNEL	COMMAND	
CBU-D80X18 WW	12-24 Vdc	2 x CV	2	APP CASAMBI	DIMMER
CBU-D80X18 TW	12-24 Vdc	2 x CV	2	APP CASAMBI	TUNABLE WHITE

¹ Only for control logic protec on

REFERENCE STANDARD

EN 61347-1	Lamp controlgear - Part1: General and safety requirements		
1FN 55()15	Limits and methods of measurement of radio disturbance characteris cs of electrical ligh ng and similar equipment		
EN 61547	Equipment for general ligh ng purposes - EMC immunity requirements		

TECHNICAL SPECIFICATIONS

		Constant Voltage			
Supply voltage		Min: 10.8Vdcmax: 26.4Vdc			
Input current		Max 4A			
Channel		4			
Output voltage		= Vin			
Output current		A/ch	A tot.		
		4 A ²	4 A ²		
Nominal power ²	@1	V 48W	48 W		
Norninai povvei -	@ 2	V 96W	96W		
Power loss in standby mode			<500mW		
Type of load			R		
D-PWM dimming frequency			600 Hz		
D-PWM resolu on			833 step		
Opera ng frequencies		2,400 2,483 GHz			
Maximum output power		4 dBm			
D-PWM range		0 – 100%			
Storage temperature		min: -25°Cmax: +60°C			
Ambient temperature		min: -10°Cmax: +40°C			
Maximum Temperature at Tc		45°C³			
Miring	Solid siz	os 0,20,75	5mm ² – 2418AWG		
Wiring	Stranded siz	os 0,20,75	0,20,75 mm ² – 2418 AWG		
Wire prepara on length		7 10mm			
Mechanical dimensions		80 x 18 x 10,5 mm			
Fixing		Bi-adhesive			
Weight			9g		

MECHANICAL DIMENSION

 $^{^2}$ Maximum value, dependent on the dissipa on condi ons. This value is measured at 40°C, it is maximum Ambient Temperature.

 $^{{}^3}$ Tc = 45 ${}^{\circ}$ C with Ta = 40 ${}^{\circ}$ C. At an ambient temperature of Ta = 20 ${}^{\circ}$ C Tc = 25 ${}^{\circ}$ C

Device Manual

INSTALLATION

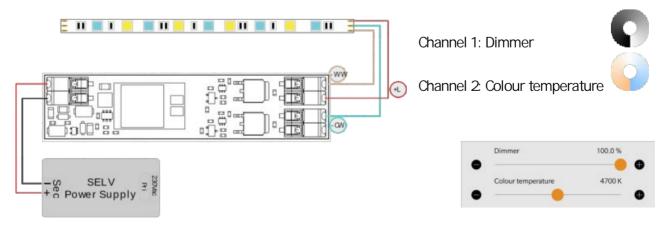

To set the product, follow the instruc ons below.

- Fix the Casambi Driver inside the aluminium profile by the provided thermal Bi-adhesive;
- Connect the LED in the output channel;
- Connect the power supply into the input of the dimmer.

This Product as any other Casambi product, should not be placed in a metal endosure or next to large metal structures. Metal will e ec vely block all radio signals which are crucial to opera on of the product.

Device Manual

Tc POINT

TECHNICAL NOTE

Installa on:

- Installa on and maintenance must be performed only be qualified personnel in compliance current regula ons.
- The product must be dissipated correctly.
- Keep separated the circuits at 230V (LV) and the circuits not SELV from circuits to low voltage (SELV) and from any connect on with this product. It is absolutely forbien to connect, for any reason whatsoever, directly or indirectly, the 230V, the 230V mains voltage to the bus or to other parts of the circuits.

Power Supply:

- For the power supply use only a SELV power supplies with limited current, short circuit protec on and the power must be dimensioned correctly. In case of using power supply with ground terminals, all points of the earth (PE = Protec on Earth) must be connected to a valid and cer fied protec on earth.
- The connection on cable between the power source "low voltage" and the product must be dimensioned correctly and they should be isolated from every wiring or parts at not SELV voltage. It is suggested to use double insulated shielded.
- Dimension the power supply for the load connected to the device. If the power supply is oversized compared with the maximum absorbed current, insert a protect on against over-current between the power supplies and the device.

Outputs:

- The length of the connec on cables between the product and the LED module must be less than 10m. The cables must be dimensioned correctly and they should be isolated from every wiring or parts at not SELV voltage. It is suggested to use double insulated shielded cables.

WARNING: For op onal func onality of the Bluetooth signal, do not put the device into metal or aluminium boxes and do not shield the device.

As any other Bluetooth product, should not be placed in a metal endosure or next to large metal structures. Metal will e ec vely block all radio signal which are crucial to the opera on of the product.
