

HANNOVER by Luz Negra

Our PROFESSIONAL led profile series is manufactured in high purity aluminium and silver anodised. This profile can be used for many different purposes, such as ceilings and signage, due to its ultra thin methacrylate with optical effect. Its etched methacrylate surface makes it ideal for hanging (display signs). We can also manufacture hanging or wall-based luminaires, both with Up&Down or side lighting. Its use with glass or methacrylate converts it into a practical illuminated shelf. Suitable for led strips with a maximum width of 11mm and a power not greater than 30W/m. We recommend using it with COB our strip in order to obtain intense brightness.

We offer a 10 year guarantee.
