

VARIO30-08

Vario30-08 is a complementary profile for the Vario30-01, Vario30-02 and Vario30-03 suitable for suspended and surface mounting. This complementary profile allows you to easily surface mount or suspend the Vario30 series LED channels. This profile can also be used on its own to mount a power supply. The clip in design feature also allows for easy access to LED drivers that may be installed into the LED channel. A range of optional accessories provides for infinite configuration possibilities
