## DESCRIPTION

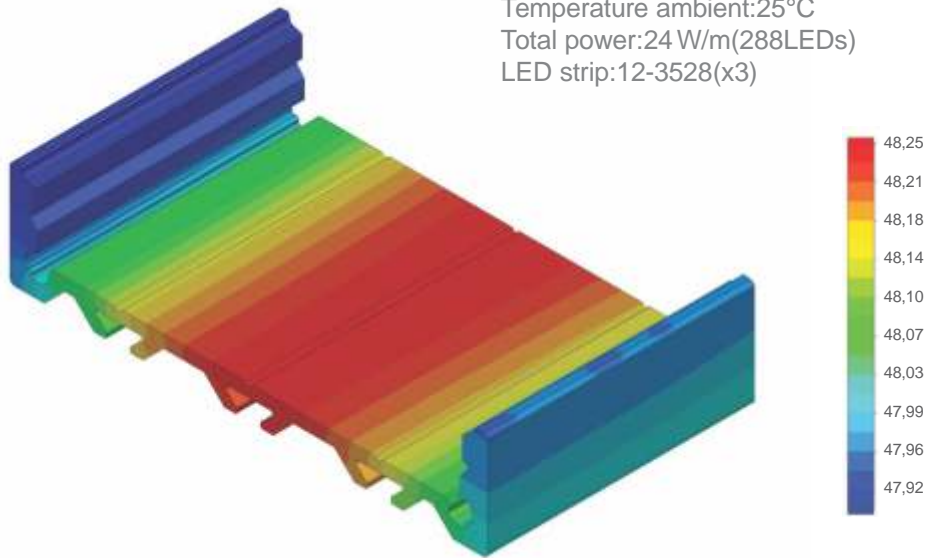

Super wide aluminum profile with the 36,6mm space for the extra wide LED strips or the triple row of standard 12mm LED stripes. It is a low design with the aluminum body directly screwing to the surface by the ST 2,2x9,5mm self threading screws. Almost flat snap in UV resistant di user is providing quality finish to this LED lamp. The profiles are available with three di erent types of light di users, frosted, 50% frosted and transparent. SLW10 LED profile is also equipped with stylish aluminum end caps screwed onto the profile.
