LEAD AND HEAVY METAL REPORT

All gasket material produced by TYM Seals & Gaskets Ltd uses cellulose base paper, impregnated with gelatin, glycerine and other organic plasticisers and dyestuffs.

All packaging material consists of a polyethylene moisture barrier and cellulose based pallet boxes, all of which are suitable for recycling.

No Lead, Cadmium, Hexavalent Chromium, Polybrominated byphenyls, Polybrominated dephenyl esters, Mercury or any other heavy metal is used or has been used in our production process.
