RoHS and REACh Compliance

TYM's silicone rubber products are fully compliant with the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (RoHS) regulation contained in Article 4(i) of the European Parliament and Council's Directive 2002/95/EC

RoHS mandates that manufacturers restrict the use of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls, polychlorinated biphenyls and polybrominated diphenyl ethers in electrical and electronic equipment.

TYM's silicone rubber products are also fully compliant with the Registration, Evaluation and Authorisation of Chemicals (REACh) regulation (European Union 1907/2006). Our products do not contain any of the chemicals identified as Substances of Very High Concern (SVHC) by the European Chemicals Agency (ECHA), which oversees REACh compliance.
