10	5mm Hex Key	1

This mount is designed to work with motorcycles that have an available 8mm diameter hole intended for an aftermarket mirror. This includes many BMW Motorcycles.

Warning: Installation of the mount should be performed by a qualified technician. Improper installation may interfere with the safety and proper operation of the product and/or vehicle.

1. Place the motorcycle on a center stand.
2. Using the *5mm Hex Key*, fasten the *Mounting Post* to the bike's mirror hole with the *Post Screw* and *Post Washer* as shown in Figure 1. Make sure that the assembly order is such that the *Post Washer* is contacting the head of the *Post Screw*.

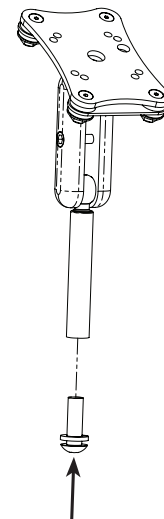

Figure 1

3. Using the $5/32$ " Hex Key, loosen the *Positioning Screw* as shown in Figure 2.

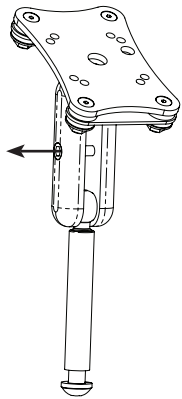

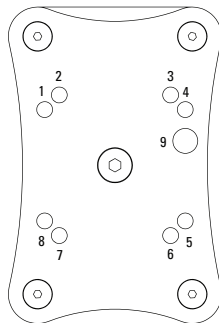

Figure 2

4. Fasten the accessory device or cradle to the top of the *Mounting Plate* utilizing appropriate hardware. The eight "AMPS" pattern holes (1-8) will accommodate #8 or M4 screws. The larger hole (9) will accommodate a $1/4$ " or M6 screw. Alternatively, double sided adhesive tape or hook and loop fastener may be used.

Mounting Plate Holes

5. Adjust the mount to the desired position and tighten the *Positioning Screw* to lock the assembly in place.

Warning: Verify that the position of the mount and accessory will not interfere with proper operation of the vehicle.

Warning: Make sure all screws and nuts are securely tightened before each ride so that the assembly will not move during use.
