

# PARK-N-MOVE USAGE GUIDE

PROUDLY MADE IN THE USA

***We strongly recommend you visit our website at [www.AdaptivTech.com](http://www.AdaptivTech.com) and view the videos of the Park-n-Move in action before using it with your motorcycle.***

- When loading a motorcycle onto the **Park-n-Move**, it is suggested to leave the casters **UNLOCKED**. By having the casters unlocked, the **Park-n-Move** will be 'drawn under' the motorcycle. This makes the placing of the motorcycle on the center stand easier as the motorcycle will not have to be lifted 'up and back'.
- When unloading a motorcycle from the **Park-n-Move**, locking the casters is not always required.
- If a rider is sitting on the motorcycle, locking the casters is suggested before 'rocking' the bike forward.
- If a rider is standing next to the motorcycle, place the left booted foot (flip flops NOT recommended) in front of one of the casters or on the edge of the **Park-n-Move** in front of the nearest leg of the center stand and rock the motorcycle forward. The **Park-n-Move** will not roll over your foot given the weight of the motorcycle and the low ground clearance of the **Park-n-Move**.
- If extra effort is required to lift the bike onto the center stand for big bikes such as the Gold Wing or K1600GTL, construct the follow 'cheater steps':
  - Take two pieces of 1/4" plywood, one 12" x 12" and the second 12" x 24" and stack them in a stair step manner. This will allow the bike to easily raise 1/4" at a time for a total extra height of 1/2". Roll the front or rear wheel onto these 'steps'. Now the bike is 1/2" higher, making it easier to place on the center stand and the **Park-n-Move**. Not in a carpentry mode? No problem, stack magazines instead.
- **DO NOT** use the **Park-n-Move** on rough surfaces such as gravel or rough, cracked concrete.
- **DO NOT** use the **Park-n-Move** to load or unload motorcycles from trailers or trucks.
- **DO NOT** use the **Park-n-Move** as a substitute for formal motorcycle repair lifts.
- **DO NOT** attempt to drive on to, off of, or over the **Park-n-Move**.

The **Park-n-Move** has a **LIFETIME WARRANTY** on all parts and components (scratches and rust not covered) and a 30 day money back guarantee if not satisfied. To initiate a return or warranty claim, you must contact us first to receive a Return Merchandize Authorization (RMA) number. Original shipping costs are non-refundable and return shipping costs are the responsibility of customer.
