

MP9 Three-in-One On-Wall Speaker System

The M&K Sound MP9 is a breakthrough product that offers a sophisticated solution to the problem of filling your living space with multiple loudspeakers in order to experience a truly satisfying and convincing surround soundfield.

Precision engineered and stylishly crafted, MP9 integrates three completely independent two-way loudspeakers in a single enclosure designed for all-in-one front or rear Left/Center/Right coverage in a potent, yet elegantly unobtrusive surround system.

Available in a handsome High Gloss Black or White finish to please even the most design-conscious interior decorator, the MP9 is fitted with integral keyhole brackets for easy, secure wall mounting. The rear panel also incorporates three removable speaker wire connector blocks (one per channel). Cable ends are screwed to each block which then snaps into place for a tight, concealed, flush-mount connection.

MP9 essentially consists of three M5 loudspeakers assembled in a single low-profile enclosure, with little in common with typical "soundbar" configurations that combine dubious psychoacoustic trickery with cheap drivers to produce an unstable pseudo-surround effect that can only work in a restricted "sweet spot" listening area.

MP9 produces three distinct channels of sound from three distinct loudspeakers, creating a virtually holographic sonic illusion throughout the entire room.

In keeping with its pure-bred M&K Sound professional heritage, MP9 performs superbly, delivering uncannily realistic, three-dimensional sound, without implementing digital signal processing to artificially simulate a surround effect.

Simply position MP9 at the front and/or rear of the room for a scintillatingly natural surround experience from an ultra-compact three-in-one loudspeaker system.

In addition to identical high quality audio performance across all three channels, the MP9 is voiced and carefully tuned to match the tonality and timbre of any model in the full M&K Sound range for convenient, flexible system building.

MP9 Specifications

Finish	High Gloss White with off-white cloth grille High Gloss Black with black cloth grille
Drivers (per channel, 3 channel LCR) 1" soft-dome ferrofluid neodymium tweeter 2 x 4" coated pulp bass/mid, magnetically shielded	
Frequency Response	100 Hz - 20 kHz ±2dB
Crossover	2 kHz, Phase-Focused
Impedance	4 Ohm
Dimensions (HxWxD)	40x4.8x3.3" -101.6x12.2x8.5 cm (w. front) 40x4.8x2.9" -101.6x12.2x7.6 cm (- front)
Weight	19.8 lb/9.0 kg
AccessoriesWall anchor and screw, wall mount template

M Series - Precision Loudspeakers for a High Definition World

- **Exclusive Phase-Focused Crossover**
- **Metal mesh front grille**
- **Voice-matched satellites and rear speaker**
- **Proprietary M&K Sound Tripole surround technology**

M&K Sound M Series

M&K Sound professional active bi-amplified monitors have become the reference standard in the finest music and film studios throughout the world. Hundreds of facilities, including Sony Pictures, Twentieth Century Fox, Skywalker Sound, Warner Bros., Dolby Laboratories, DTS, as well as leading sound designers, mixers and composers, all rely on the smooth, accurate sound of M&K Sound.

With the M Series, M&K Sound establishes a new benchmark for affordable, compact home entertainment systems. Featuring the same richly detailed, dynamic sound that defines every M&K Sound loudspeaker, the M Series delivers realistic high-performance sound for music and movie soundtracks in a subtly elegant, room-friendly package.

The M Series employs proprietary M&K Sound Phase-Focused crossover technology to achieve seamless integration of woofers and tweeter in the frequency domain. The carefully optimized crossover points add new dimensions to the famed clarity of M&K Sound loudspeakers by implementing ideal transient response and time domain characteristics.

As a result of extensive frequency domain and time domain analysis, MK M Series speakers deliver smooth response over a very wide listening window, as well as more focused and coherent sound on-axis all the way up to the highest frequencies.

For all these reasons, the in-room response of the M Series is defined by the three-dimensional realism that has put M&K Sound at the forefront in the art and science of sound reproduction.

The Choice of Professionals™

The Choice of Professionals™

M7 Compact Loudspeaker

With features like a high performance silk-dome tweeter, smooth, double 4" bass/midrange drivers, magnetic shielding and full-bodied sound with wide dynamic range reminiscent of the finest M&K Sound professional studio monitors, the M7 earns the right to bear the M&K Sound name.

The compact cabinet and distinctive metal mesh grille make the M7 a stylish addition to any living space for critical or informal listening.

The delicate sonic transparency and tremendous dynamic capabilities of these loudspeakers deliver a rare combination of minimal coloration and effortless handling of voices, percussive effects and musical instruments with life-like impact.

M7 Specifications

Finish	Black satin with black metal mesh grille White Satin with white metal mesh grille
Drivers	1" soft-dome ferrofluid neodymium tweeter 2 x 4" coated pulp bass/mid, magnetically shielded
Frequency Response	80 Hz - 20 kHz ±2dB
Crossover	Phase-Focused
Impedance	4 Ohm
Dimensions (HxWxD)	13" x 4.9" x 6.4" - 33 x 12.5 x 16.3 cm
Weight	8.8 lb/4.0 kg

M5 Satellite Loudspeaker

For smaller spaces or installations where high sound pressure levels and the full weight and power of the M7 or MP7 are not required, M&K Sound offers the smaller M5 satellite. Based on the same advanced proprietary crossover and driver technologies as the taller M7 and MP7, the M5 satellite utilizes a single 4" bass/midrange unit with cast basket to achieve sound quality, accurate imaging and detail identical to its larger siblings, but not quite the same high output levels.

The M5 produces an accuracy, tonal balance and clarity of sound far beyond ordinary loudspeakers of comparable price and size.

M5 Specifications

Finish	Black satin with black metal mesh grille, White satin with white metal mesh grille
Drivers	1" soft-dome ferrofluid neodymium tweeter 4" coated pulp bass/mid, magnetically shielded
Frequency Response	100 Hz - 20 kHz ±2dB
Crossover	Phase-Focused
Impedance	4 Ohm
Dimensions (HxWxD)	7.4" x 4.9" x 6.4" - 18.8 x 12.5 x 16.3 cm
Weight	4.8 lb/2.2 kg

M4T Tripole Surround Speaker

The M4T Tripole is the multi-polar side and rear channel speaker voice-matched for the M Series satellites, providing the benefits of exclusive M&K Sound Tripole technology in a remarkably compact and affordable package.

Combining a direct-radiator speaker (front-mounted drivers) with a dipole speaker (side-mounted drivers) in the same cabinet and utilizing M&K Sound's proprietary Phase-Focused Crossover, the M-4T Tripole design provides extraordinarily even dispersion of sound throughout the room across a broad listening area with superior imaging and sound quality.

The M-4T is timbre-matched to the M7, MP7 and M5 for a rock-steady consistent surround soundfield with seamless transitions as voices and sound effects move across or through the three-dimensional soundstage.

M4T Specifications

Finish	Black satin with black metal mesh grille, White satin with white metal mesh grille
Drivers	1" soft-dome ferrofluid neodymium tweeter 4" coated pulp bass/mid 2 x 3" full-range side drivers
Frequency Response	100 Hz - 20 kHz ±2dB
Crossover	Phase-Focused
Impedance	4 Ohm
Dimensions (HxWxD)	7.4" x 6" x 6.75" - 18.8 x 15.2 x 17.1 cm
Weight	6.5 lb/2.9 kg

MP7 On-Wall Speaker

Essentially a half-depth, wall-mount version of the popular M7, the MP7 on-wall monitor offers the attractive option of extremely shallow cabinet depth for décor-friendly, discrete on-wall placement to bring vastly improved sound to any flatscreen TV.

MP7 is designed specifically for direct on-wall mounting and is fitted with integral rear panel brackets, along with specially designed damping pads to ensure easy and vibration-free installation.

The clarity and sonic performance of the MP7 make legendary M&K Sound quality available with a new, compact, stylish form factor in High Gloss Black or White.

MP7 Specifications

Finish	High Gloss White with off-white cloth grille High Gloss Black with black cloth grille
Drivers	1" soft-dome ferrofluid neodymium tweeter 2 x 4" coated pulp bass/mid, magnetically shielded
Frequency Response	80 Hz - 20 kHz ±2dB
Crossover	Phase-Focused
Impedance	4 Ohm
Dimensions (HxWxD)	21.2" x 4.7" x 3.5" - 54 x 12.5 x 9 cm
Weight	9.2 lb/4.2 kg
Accessories	Wall anchor and screw, wall mount template
