

## BRIGHTEN

Brighten utilizes a multitude of brightening agents - all hydroquinone free - to help lighten, even skin tone and minimize the look of hyperpigmentation. Brighten has the most potent non-hydroquinone arsenal in the fight against uneven skin tone.

## BRIGHTEN - EYE CARE

AM

PM

- DARK CIRCLE RELIEF CREAM** - 1% Vitamin K Oxide
- Vitamin K Oxide helps reduce the appearance of discoloration and dark circles under the eyes. Light-reflecting minerals have been added to help reduce the appearance of the transparency of the skin and dark under eye pigmentation.

## BRIGHTEN - FACE

AM

PM

- XCP BRIGHTENING SERUM** - 10% L-Ascorbic Acid, 2% Phytic Acid
- This powerful combination of L-Ascorbic Acid and Phytic Acid helps improve the appearance of uneven skin tone while protecting against sun damage.

- KNR SERUM** - 2% Kojic Acid, 4% Niacinamide, 0.15% Retinol
- This Serum contains three powerful agents – Kojic Acid, Niacinamide and Retinol – which, along with peptides and other skin rejuvenation ingredients, help brighten and even skin tone. KNR Serum features an exclusive Retinsphere® liposomal delivery system which helps increase penetration and efficacy of the Retinol.

**TIP:** Utilize XCP in the morning and KNR at night to coincide with the skin's circadian rhythm and skin's natural defense/repair process.

- BRIGHTENING CREAM** - 7% Arbutin, 3% Phytic Acid
- Brightening Cream combines 7% Arbutin with 3% Phytic Acid to help lighten skin, plus dimethicone and collagen to help improve the appearance of skin tone and texture. These ingredients are delivered in a highly emollient and moisturizing cream.
