

Ask your skin care provider about other product lines from Biopelle®

Exfoliate

The Exfoliate line features a unique and synergistic combination of AHAs plus Taurine. Taurine helps to calm the skin and, when combined with Glycolic Acid, enhances the exfoliation effect on fine lines and wrinkles as it decreases irritation often associated with Glycolic Acid.

Tensage® Growth Factor

Tensage features SCA Biorepair Technology, a special secretion from the *Cryptomphalus aspersa* snail, which contains growth factors combined with glycoproteins and antioxidants. Tensage is clinically proven to help improve the appearance of fine lines and wrinkles, increase elasticity and enhance texture, tone and luminosity.^{1,2} Tensage has a complete line of products to help rejuvenate skin and reverse the visible signs of photo-damage.

Brighten

Brighten utilizes a multitude of brightening agents - all hydroquinone free - to help lighten, even skin tone and minimize the look of hyperpigmentation. Brighten has the most potent non-hydroquinone arsenal in the fight against uneven skin tone.

PRESCRIBEDsolutions® [CUSTOMIZED SKINCARE] is a customizable product line that increases results by providing a simple, 3-step regimen of multi-tasking products with unique performance ingredients and added boosters for customization.
