

BRUTE[®]

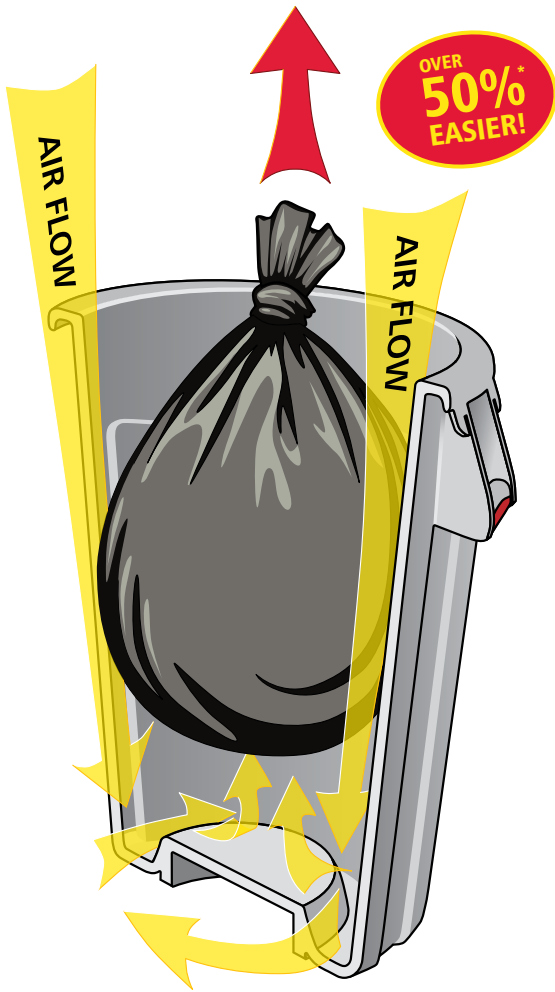

WITH VENTING CHANNELS

Innovative Design

THE NEW BRUTE®

The new BRUTE® utility container features innovative solutions for making waste collection more efficient—along with the quality, durability, and superior performance found in every BRUTE® product.

INTEGRATED VENTING CHANNELS

Four patent-pending venting channels dramatically reduce the force required to remove a full can liner by over 50%* when compared to traditional containers.

*Based on internal testing.

BETTER WASTE MANAGEMENT

The new BRUTE® utility container is available in multiple colors for improved waste stream management. Uses include blue for segregating recyclable waste, gray and yellow for general refuse, and black for waste collection areas that require a more aesthetic design.

IMPROVED LID

Optional self-draining lid reduces pooling when containers are stored outside.

INNOVATIVE CAN LINER CINCHES

Four patent-pending can liner cinches allow easy one-step liner retention and eliminate knot tying.

NEW PROTOUCH™ HANDLES

New, fully round ProTouch™ handles provide a comfortable, secure grip during lifting.

EASIER HANDLING

Molded base grips on the bottom of the container are deeper and ribbed for better control during emptying.

Innovative Design

NEW DESIGN, NEW ADVANTAGES, AND FAMOUS BRUTE® DURABILITY

The new BRUTE® utility container and lid work with all existing BRUTE® products and accessories, including BRUTE® dollies, rim caddies, lids, dome tops, and containers, for a complete waste collection system.

2643-60 Container
with 2645-60 Lid
