

HEAVY METALS TESTING INSTRUCTIONS

Place your sample in the vial, return the vial to us, and we'll test it for lead, arsenic, cadmium, mercury and a dozen other elements and metals. You will receive the resulting report electronically.

DETAILED INSTRUCTIONS:

1. Fill the vial all the way to the top with the substance to be tested. Acceptable substances are water, soil, hair, powders or even nutritional supplements.
 - Do not fill with solvents or dangerous chemicals.
 - Do not fill with foods that might mold or decompose during shipment.
 - If filling with soil, do not pack the soil into the vial.
 - **We do not accept body fluids of any kind.** No blood, urine, semen or breast milk.
2. Tightly screw the lid back onto the vial. If the vial contains a liquid, tape the lid closed by applying tape around the circumference of the lid, securing it tightly to the vial.
3. Place the vial into the provided plastic bag and seal it tightly. The purpose of this bag is to contain your sample in case the vial leaks.
4. **Send the vial back to us using the return shipping label and address provided.**
 - You may use any carrier you wish, including the postal service, UPS, Fedex, DHL, etc.
 - If you wish to track your shipment, use a trackable carrier.
5. You will receive the resulting report via email within 10 working days after we receive your sample.
 - Watch your email for the results report. We will send the results report to the email address you used to make your purchase at the Health Ranger Store.
 - If you do not see the results within 15 working days, please contact us at Support@CWCLabs.com
