

# HOW TO MAKE THINKING PUTTY® DANCE

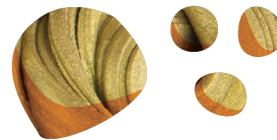

We've been known to host a dance party or two at Puttyworld® HQ and that extends beyond our fun-loving employees! Every time we turn around it seems Magnetic Thinking Putty® is surprising us with a new dance move, thanks in no small part to Crazy Aaron's genius in creating a putty that is truly magnetic.

One of our favorite Magnetic Thinking Putty dance moves is the "snake charmer." Transformed into a rattle snake, the putty sways and moves - just like a snake from a basket! Learn how to make your own Thinking Putty snake and watch it dance with this easy to follow tutorial. Disco ball optional.

## DIY SUPPLIES:

1. Magnetic Thinking Putty of choice
2. Magnet (included with purchase)

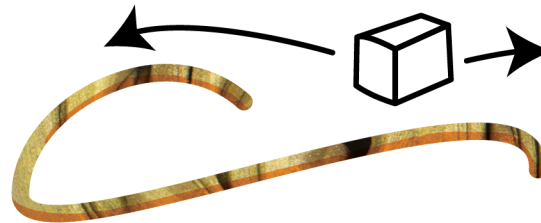

## STEP-BY-STEP GUIDE

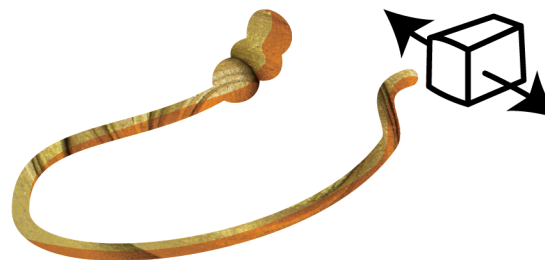

Form your Magnetic Thinking Putty in one (1) large ball and three (3) small balls

Roll the Thinking Putty into a long cylinder to form the snake's "body"

Charge the magnetic effect by passing the included magnetic back and forth over the body of the snake

Assemble the snake by adding the 3 smaller balls to its tail, making it a rattle snake

Blast your favorite jams and move the magnet from side to side at the snake's head to watch it bob and sway, dancing to the music
