## **Kilt Hire Measurement Guide**

### **Height**

Usual height in bare feet.

### **Neck Size**

Wrap measuring tape loosely around your neck, about one inch from the meeting of your neck and shoulders.

### **Chest**

Measure loosely around chest at underarm height while wearing a shirt/vest (no jacket), with arms by the sides. Do not inflate chest.

### **Waist Measurement**

Measure around waist at navel height. Take measurement firmly, so that kilt will sit comfortably without falling down.

### **Seat Measurement**

Measure loosely around seat at widest point.

### **Shoe Size**

If possible, give your usual NZ shoe size. If you are not sure of this, measure from the heel to the tip of your longest toe; flatten your foot by shifting your weight forward to ensure an accurate reading.
