

## AutoQuartz (Kinetic) Movement

The DelRay needs to be charged when the second hand ticks at two-second intervals. The watch is still accurate while ticking every two-seconds. To charge the DelRay, swing it side to side rhythmically twice a second. Charge is generated when the rotor spins. Swinging the DelRay 100 times builds approximately 12 hours of power reserve. Daily wear will build the power reserve, and when fully charged, the DelRay has about 6 months of runtime.

McDowell Time

# Warranty

McDowell Time provides a Two Year Warranty from date of purchase. The warranty is void if the DelRay has been damaged by accident or negligence.

To submit a warranty claim, please email McDowell Time via [email@mcdowelltime.com](mailto:email@mcdowelltime.com). Include a description for why the DelRay needs service.
